

Dell Inspiron N4010 Screen Replacement

A guide to replacing the screen and screen assembly on your laptop

Written By: Jonathan Sellier

INTRODUCTION

Replacing the screen is a lengthy process that can take a while. It is important you are gentle with the screen as it can be damaged quite easily. Additionally, the screen should be disposed of according to local laws.

TOOLS:

- [iFixit Opening Tools](#) (1)
- [Phillips #0 Screwdriver](#) (1)

PARTS:

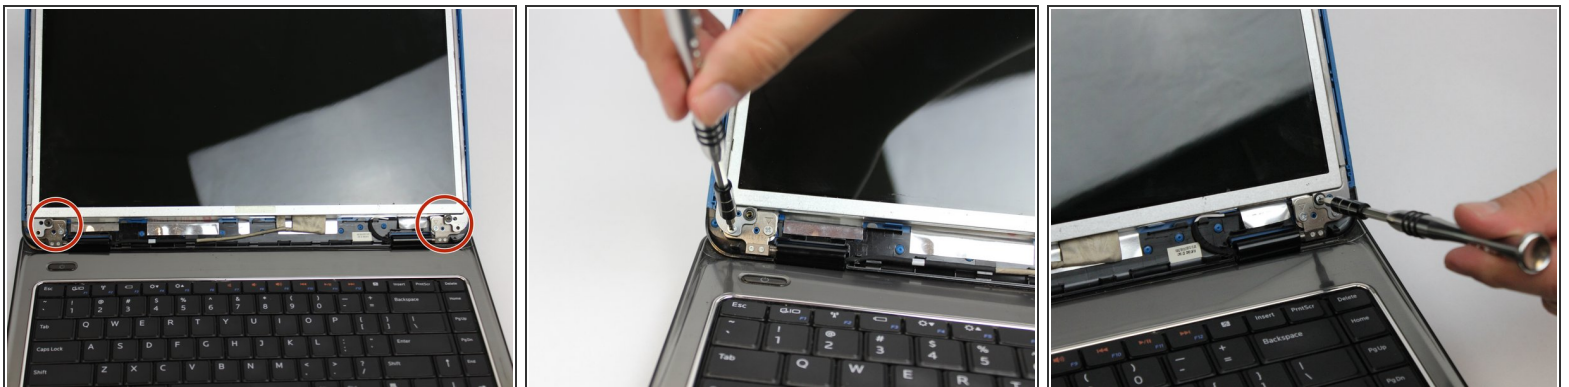

- [High Definition LCD Screen - 14"](#) (1)

Step 1 — Screen

- Use a plastic opening tool to remove the screen bezel.

Step 2

- Using the #0 Philips head, unscrew the screen bracket from the base of the laptop.

Step 3

- Remove the plastic seal located on the back of the screen to expose the ribbon connector.
- Unplug the ribbon cable from the screen.
- ⓘ Be careful when unplugging the cable. Make sure you peel the tape all the way back before disconnecting.

Step 4

- Use the #0 Philips head to remove the six screws on either sides of the screen frame.
- Remove the metal frame from the screen.

To reassemble your device, follow these instructions in reverse order.
