

# Huawei Mate 9 Back Cover Replacement

This guide shows how to replace the back cover of your Huawei Mate 9.

Written By: Tobias Isakeit

---

## INTRODUCTION

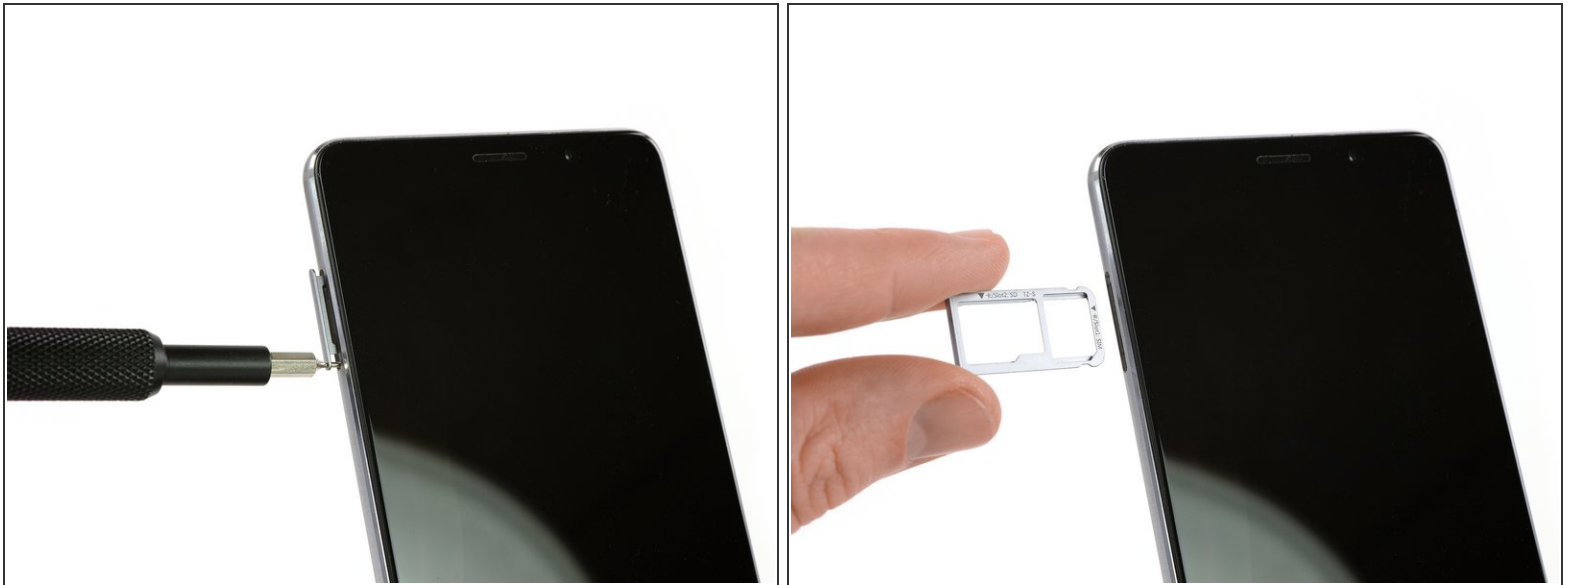

Use this guide to replace the back cover of your Huawei Mate 9 smartphone.

---

### TOOLS:

- [T2 Torx Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Spudger](#) (1)
  - [SIM Card Eject Tool](#) (1)
-

## Step 1 — Back Cover

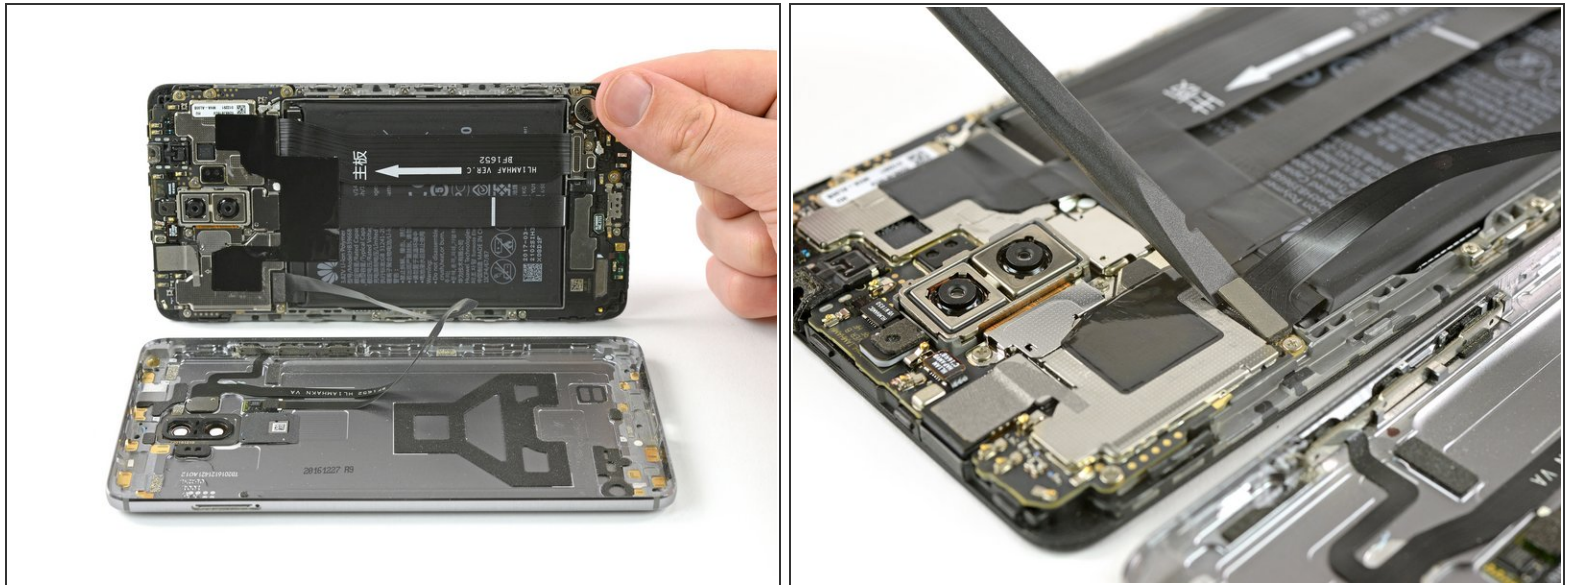

- First switch off your phone and remove the SIM card tray.

## Step 2

- Remove both screws on the bottom with a Torx T2 screwdriver.
  - Use a plastic opening tool to get between the display and the case. Open the smartphone by carefully prying out the display with all the parts out of the case.
- ⚠ Don't open the phone all the way, yet. The fingerprint sensor cable is still connected to the back cover.

## Step 3

- Swing open the phone to the right side.
- Disconnect the fingerprint sensor cable with a spudger.

To reassemble your device, follow these instructions in reverse order.
