How to check if iPod HDD is fine.

Easy guide to check if your iPod HDD is broken.

Written By: windowsio ROBLOX And More

INTRODUCTION

We will check if our HDD is working fine.

www.iFixit.com

Step 1 — Restart and boot your iPod to recovery mode.
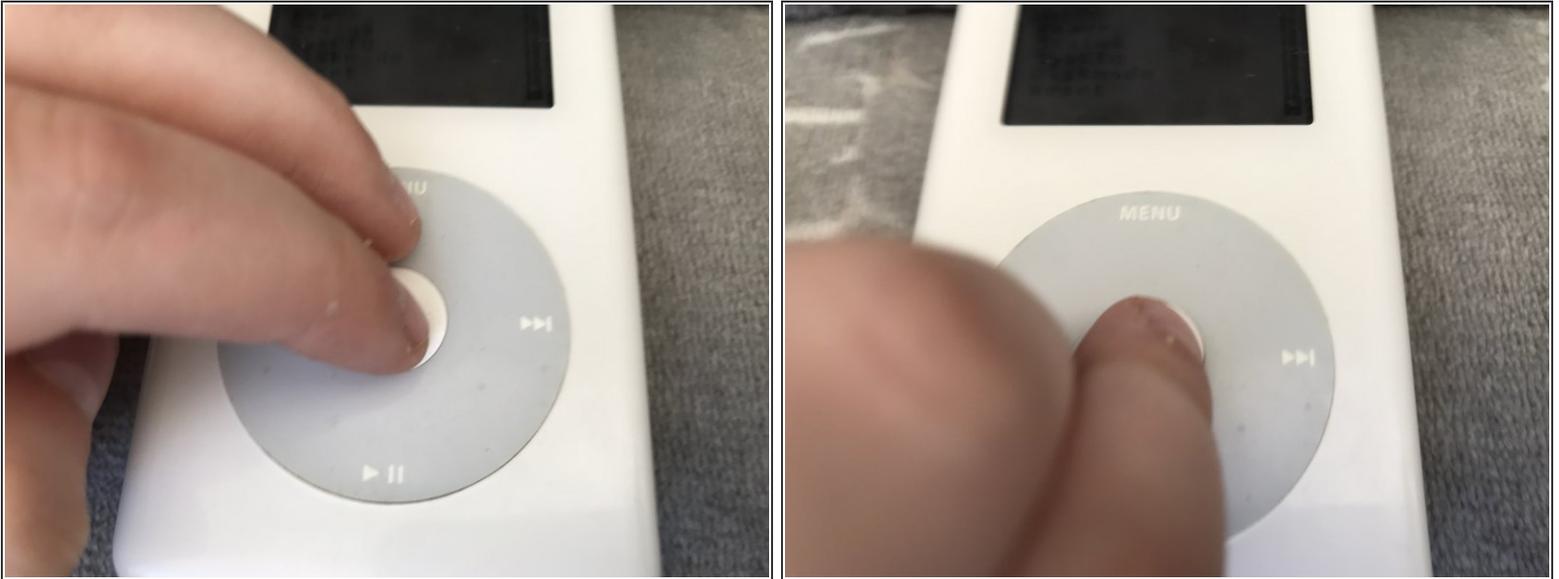

- Hold down the SELECT (middle) button and the MENU button to restart your iPod.

- Then hold down the select (middle) button and the previous track button.

Step 2 — Operating the recovery menu.
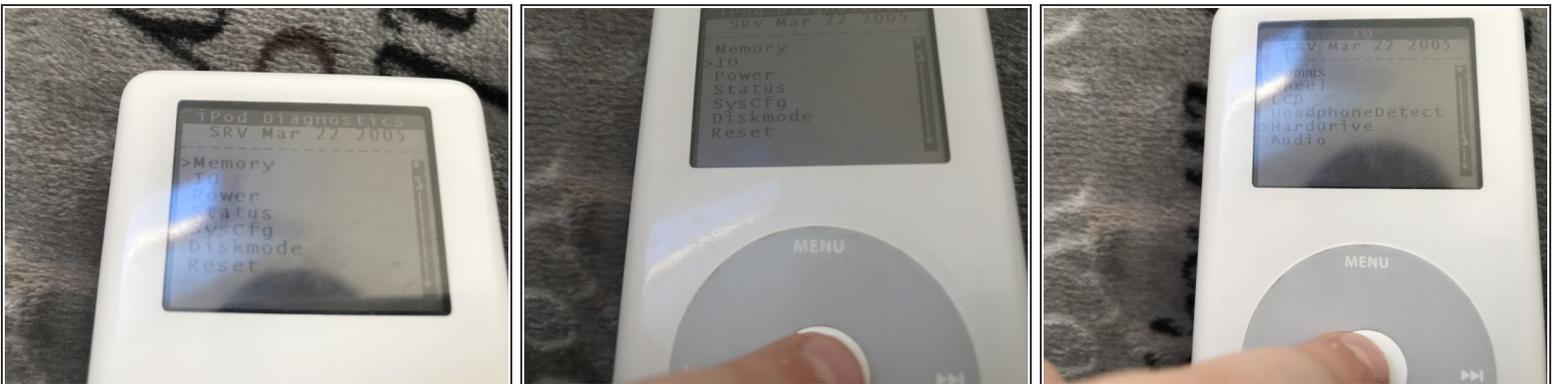

- Scroll your click wheel to IO (select with select)

- Then Hard Drive

Step 3 — Scanning the HD!
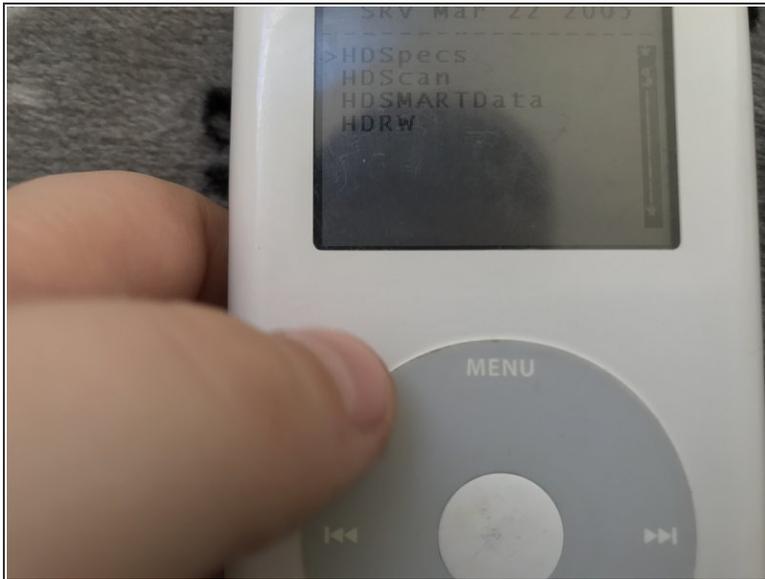

- Lastly, HDScan

- Scan takes a while, wait.

Step 4 — Conclusion.
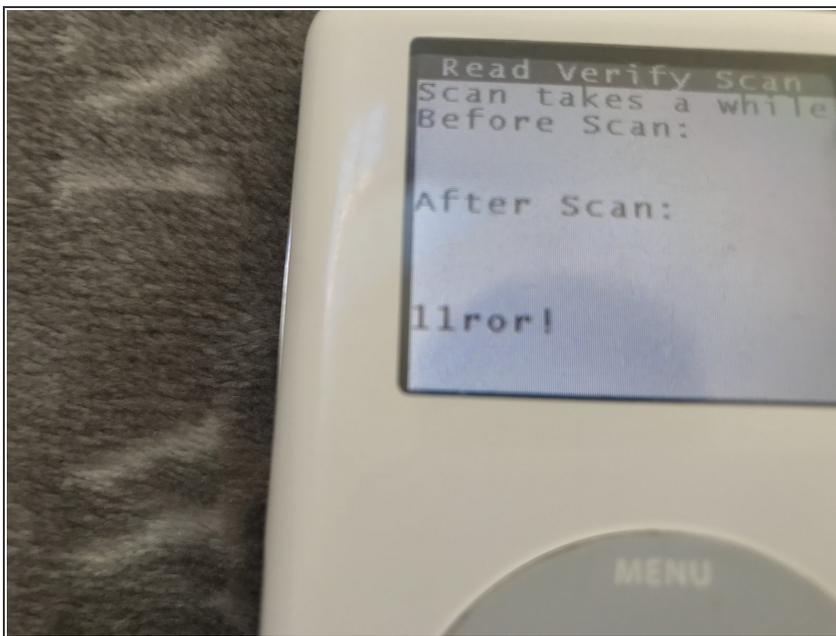

- If you get a message "11ror!" your HDD is toast. RIP HDD ;(

- Else, your HDD is fine!
