-

Step 1 — Back Cover

- Flip your device over so the back cover is facing you.
- Using a Phillips #0 Screwdriver, remove the ten 7mm screws holding the back cover in place.

Step 2

- Insert a plastic opening and run it along the edge of the back cover. Do this until the entire back cover can be removed.

Step 3 — Cooling Fan

- Unscrew and remove the 2 of the 7mm Phillips head screws holding the cooling fan in place.

Step 4

- Hold the cooling fan with one hand.
- With the other hand, grab hold of the part of the copper heat sink that is attached to the cooling fan.
- Carefully pull the cooling fan away from the attached part so that it becomes fully disconnected.

To reassemble your device, follow these instructions in reverse order.
