Step 1 — Rear Camera

- Pry back cover open with a medal spudger, or your fingernail, in the divot at the bottom left corner of the phone.

- Lift open case by the corner nearest the divot and remove it from the phone.

Step 2

- Remove the 13 1 mm Phillips screws with JIS #000 Screwdriver.

This document was generated on 2020-11-21 02:51:01 PM (MST).

Step 3

- Gently pry off the Mid frame from the phone using a Metal Spudger.

Step 4

- Use the Plastic Opening tools to gently dislodge the broken camera from the inside of the phone.

- Use a tweezers to pull the camera connector from its port.

⚠ Be careful not to tear the camera from its connection.
