

# ThinkPad Yoga 12 Bottom Cover Removal

This guide will show you how to remove the bottom cover to get inside your Yoga 12 for cleaning or repair

Written By: Tanner Lange

---

## INTRODUCTION

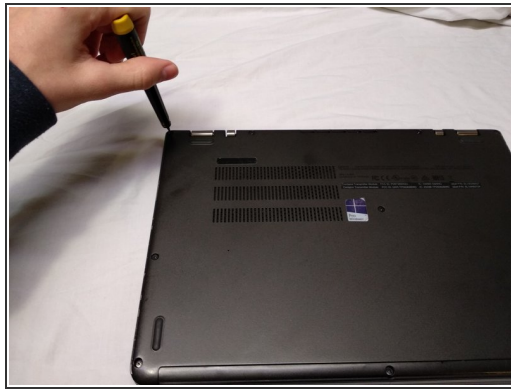

Unfortunately, my iFixit kit has not yet arrived, so I had to use my Wiha drivers and generic spudger. This is pretty simple to do!

---

### TOOLS:

- [Spudger](#) (1)
  - [Phillips #00 Screwdriver](#) (1)
-

## Step 1 — Screws

- Remove the nine Phillips screws using a Phillips 00 screwdriver

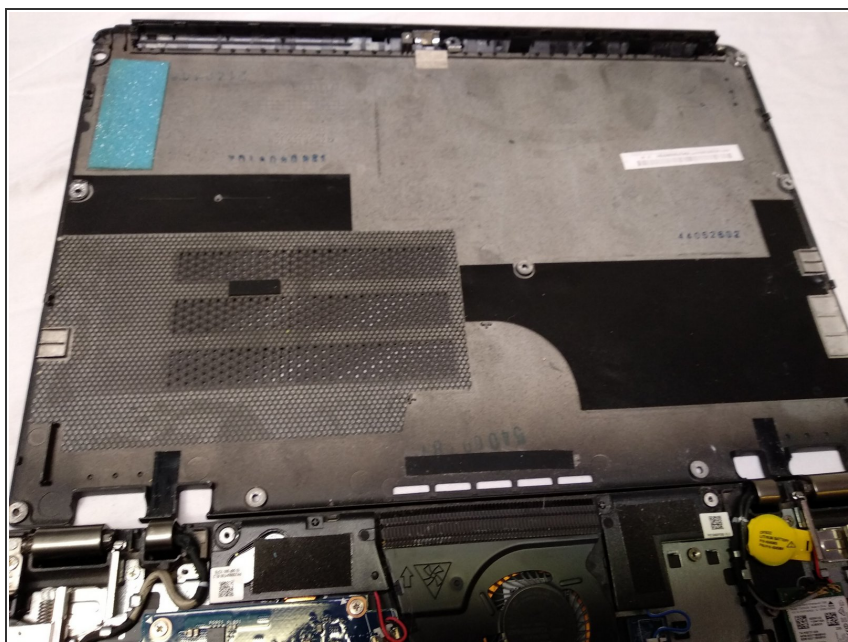

## Step 2 — Prying

- Pry up the case carefully using a spudger.

⚠ Make sure to not push the spudger in too far, as this could result in internal damage

### Step 3 — Lift off cover

- Lift off the cover, and you're done!

To reassemble, place the bottom cover on and push until you hear a satisfying click. Keep doing this until the whole cover is secured. Then, screw all of the screws back in!
