Step 1 — Stick Vacuum Power Button

- Remove the four 12mm Phillips screws , and the one large 32mm Phillips head bolt from the vacuum handle.

- Pull up on the back cover of the vacuum handle and remove it.

Step 2

- Remove the two 10mm Phillips #2 screws on the back of the green printed circuit board.

- (i) If the circuit board needs to be replaced, locate where the two white wires are soldered to the board, and de-solder the connection.

To reassemble your device, follow these instructions in reverse order.
