## INTRODUCTION

This guide will show the reader how to remove the back panel from their Acer Aspire R5-571T-59DC.

Be sure to be gentle opening the inner snaps around the lining of the cover - gently running a credit card or spudger around the inside of the lining should be sufficient to loosen the cover.

This is a prerequisite step to replacing any component connected to the motherboard.

## 🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- iFixit Opening Tools (1)

## Step 1 — Back Cover Panel

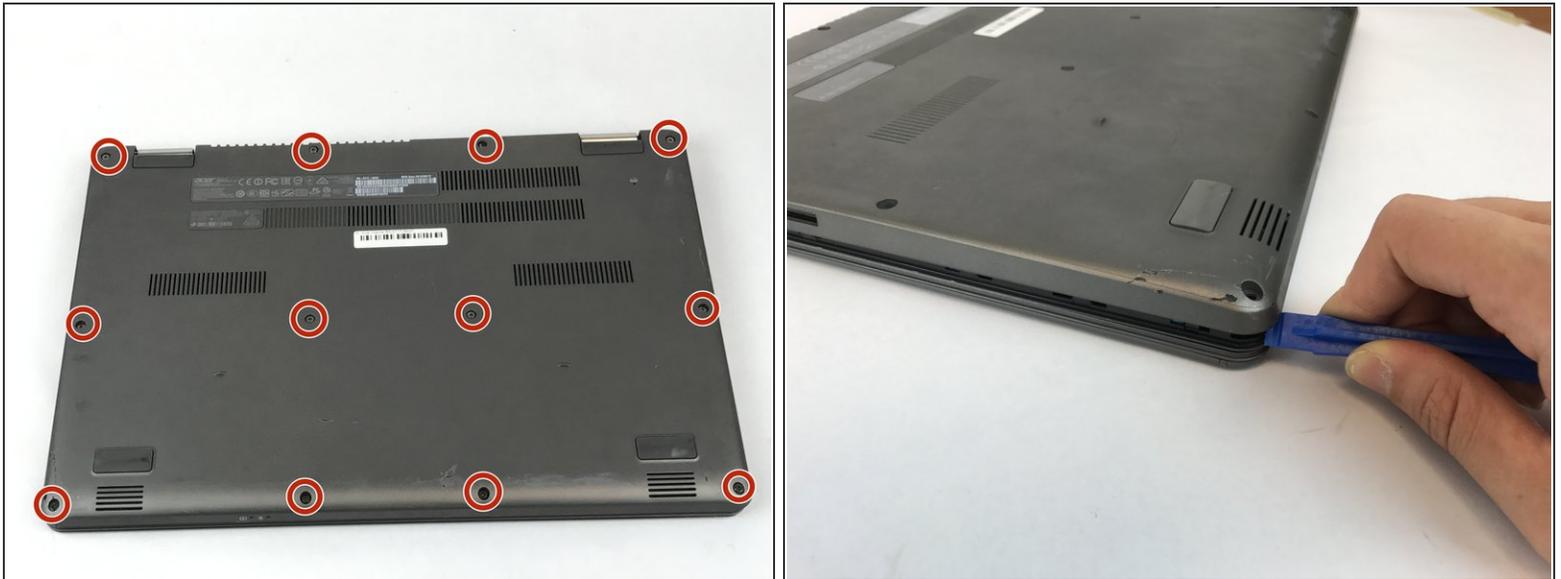

- Disconnect all power from the laptop and turn over so the bottom is facing you.

- Remove the twelve 07.mm Phillips #0 screws from the back cover.

- Work a plastic opening tool underneath and around the perimeter of the bottom cover.

- Once unclipped, remove the bottom cover.

To reassemble your device, follow these instructions in reverse order.
