

Protocol DURA VR Blade Guards Replacement

Replace the blade guards to give the drone a higher level of protection.

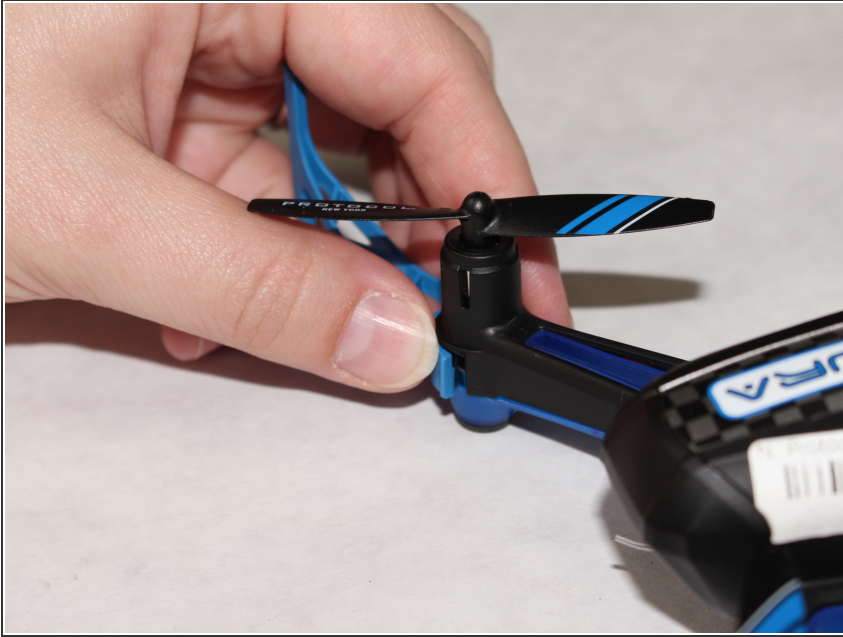

Written By: Kayla Brown

INTRODUCTION

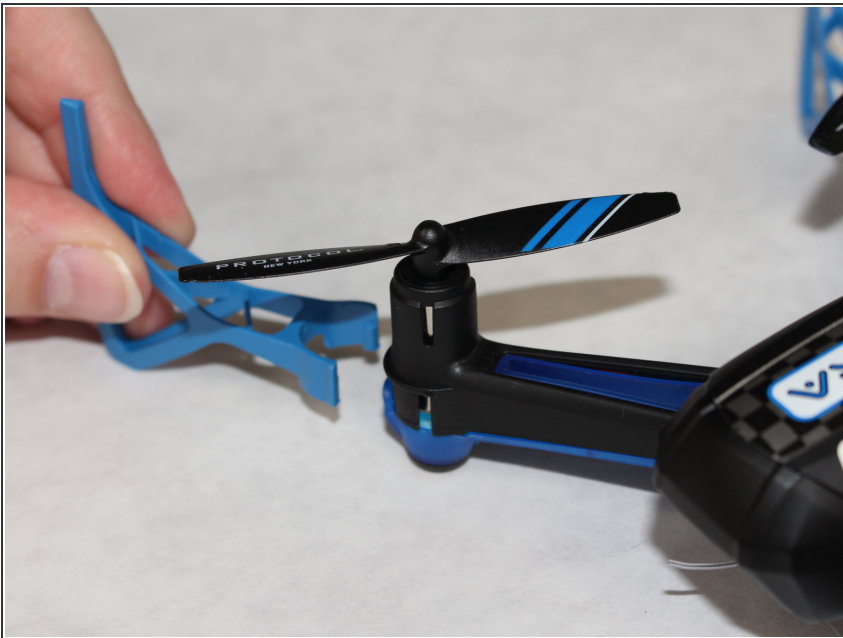

In this guide, it will tell you how to put your blade guards back on, so that your drone will have better protection while flying.

Step 1 — Blade Guards

- Take your finger tip and peel back the blue piece to unsnap the blade guard.

Step 2

- Once you unsnap one side of the blade guard, the blade guard should be able to be easily removed from the other side to detach the whole blade guard.

To reassemble your device, follow these instructions in reverse order.
