INTRODUCTION

This replacement guide is quite simple for people who aren't very tech savvy. It is fast and simple to do on your own. This replacement would be necessary if the device can't run without being plugged into a power source. Make sure the laptop is off before proceeding with the replacement.

Step 1 — Battery

- Turn the laptop over, the battery is located along the top of the device.

Step 2

- There are two rectangular tabs on the battery. With both hands, push each tab towards the center to free the battery from the device.
- keeping the tabs pushed in, slide the battery upwards.

Step 3

- The battery should pop off and release from the device.

To reassemble your device, follow these instructions in reverse order.
