INTRODUCTION

If the keyboard on your laptop is malfunctioning, has numerous missing keys, or is broken, it will need to be replaced. Once a replacement is purchased, follow this guide to effectively replace it.

TOOLS:

- Spudger (1)
- iFixit Opening Tools (1)
- Phillips #1 Screwdriver (1)

Step 1 — Keyboard

- Open your laptop. Beneath the screen, here is a large plastic piece that contains slots for a speaker, the power button, and numerous indicator lights.

- To remove this, pry it open with a spudger tool gently. It should pop out of place.

Step 2

- Remove the three 6mm screws using a Phillips #1 screwdriver.

- Once the screws are removed, the keyboard is free from the base of the laptop.

Step 3

- Disconnect the green ribbon cable using a plastic opening tool.
