

LG Optimus F60 Battery Replacement

Use this guide to replace the battery in your LG Optimus F60.

Written By: Jasmin Piena

INTRODUCTION

This guide will take you through the process of replacing a dead or dying battery in an LG Optimus F60. This task should take no more than 30 seconds to 1 minute. No tools are required for this task but the small blue opening tool is recommended for ease of use.

TOOLS:

- [iFixit Opening Tools](#) (1)

Step 1 — Battery

- Hold the phone in your hand and position the small plastic opening tool or your finger under the lip of the phone by the USB port.
- Pry or lift up on the indent with the opening tool.
- Remove the back panel.

Step 2

- Place the small plastic opening tool or your finger at the indentation at the base of the battery.
- Pry upwards or lift with your finger and remove battery.

To reassemble your device, follow these instructions in reverse order.
