

Keurig 2.0-400 Water Reservoir Replacement

After reading this guide, you will be able to replace the tank that holds water.

Written By: Alec Jamosmos

INTRODUCTION

In this guide, you will replace the water reservoir. This is necessary if you want to clean the reservoir or if it does not hold water sufficiently. The water reservoir is transparent and is located on the left side of the Keurig machine.

Step 1 — Water Reservoir

- Locate and grab the Water Reservoir with your hands.

Step 2

- Lift the Water Reservoir up. It should be easy to separate it from the main part of the brewer.

To reassemble your device, follow these instructions in reverse order.
