

Quasar Microwave Replacing the Lightbulb

How to replace a broken or burned out lightbulb in a Quasar microwave.

Written By: Melanie

INTRODUCTION

This guide explains how to replace the lightbulb in a Quasar microwave oven.

TOOLS:

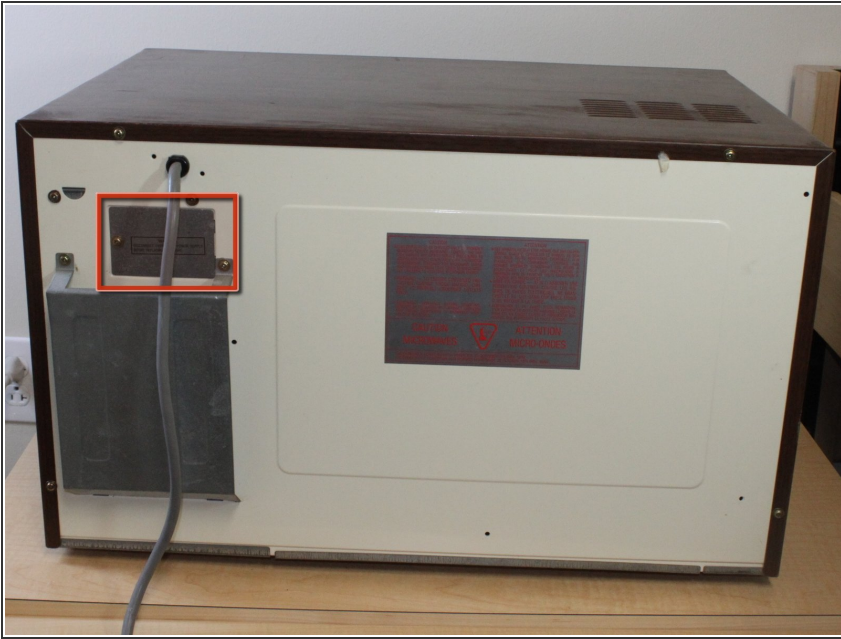

- Phillips #2 Screwdriver (1)

PARTS:

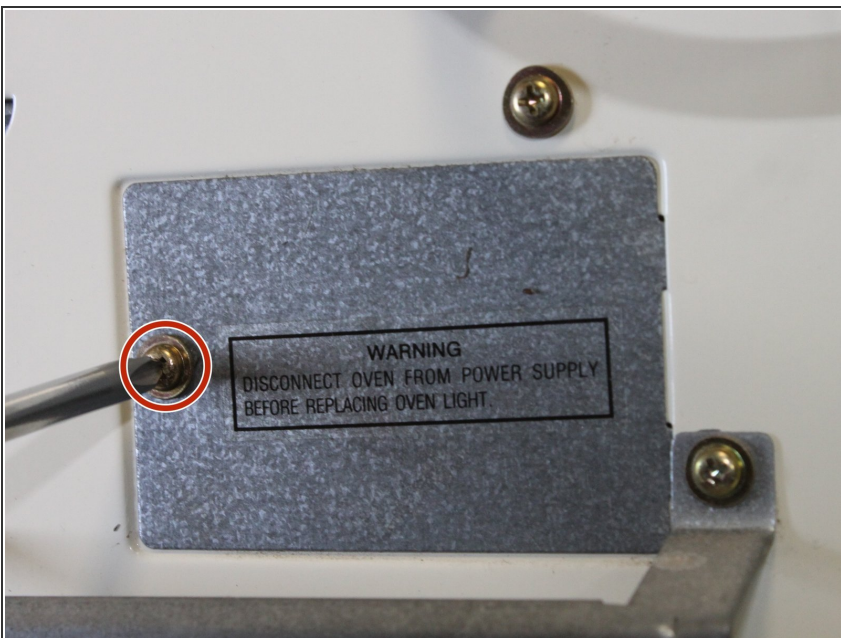

- New 40 Watt 130Volt Microwave Light Bulb (1)

Step 1 — Replacing the Light Bulb

- Locate the metal panel in the top left corner of the microwave. This covers the lightbulb compartment.
- ⚠ Disconnect the Microwave from the power source.

Step 2

- Unscrew the screw holding the metal panel in place.

Step 3

- Open the metal panel.

Step 4

- Unscrew the light bulb and replace it with a new light bulb.
- Repeat Steps 2 and 3 in reverse order to complete the replacement.

To reassemble your device, follow Steps 2 and 3 in reverse order.
