---

## INTRODUCTION

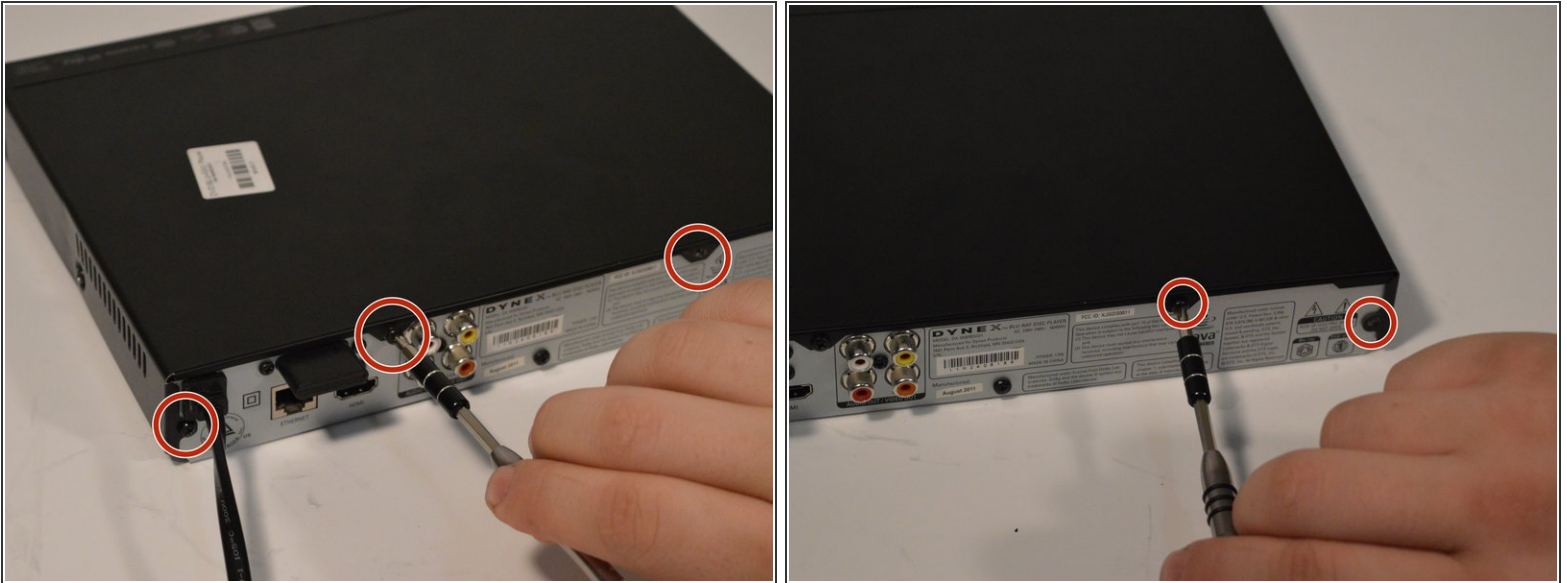

This is the guide to crack into your device, almost every repair guide will need this completed first before being able to tear into the hardware below.

---

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
-

## Step 1 — Top Cover

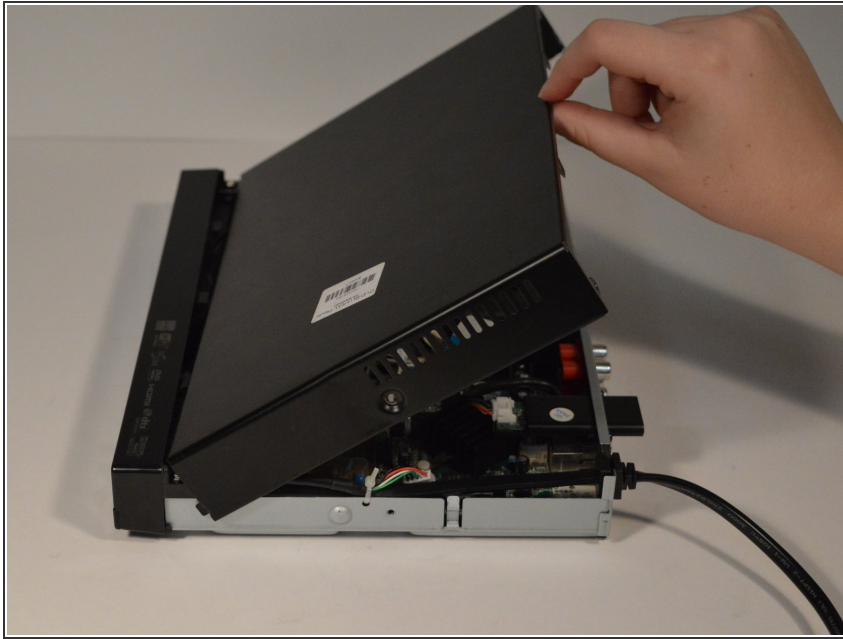

- Use a Phillips #1 screwdriver to remove the four 5mm screws that connect the black outer shell to the silver back of the device.

## Step 2

- Use a Phillips #1 screwdriver to remove the two 5mm screws on the left and right side panels.
- ⓘ There is one screw on each side that secures the cover to the body of the device.

### Step 3

- Lift the black cover to a 45 degree angle from the rear of the device and pull away from the device.
- ⚠ Check that the power cord is not preventing the device from opening or closing.

To reassemble your device, follow these instructions in reverse order.
