## Step 1 — Fix the Short in the Plug Guide

- Find the power cord.

⚠ Make sure that it is unplugged from the outlet. This is to make sure that no power is flowing through and you are not injured.

## Step 2

- Locate all exposed portions of the wire.
  - Tape over any exposed portions of the wire with electrical tape.
- ⚠ Use this power cord temporarily.

### Step 3

- Plug the power cord into the outlet and make sure the power cord is connected to the device. If not, connect the power cord to the back of the device.
- Replace the damaged cable by purchasing a new cable at your local hardware store.
