

Lenovo N20p Chromebook Keyboard Replacement

How to remove the keyboard of the Lenovo N20p Chromebook for replacement or to access the interior of the device.

Written By: Shihao Cao

INTRODUCTION

Here is a guide to help you locate the keyboard for inspection, repairs, or replacement of the Lenovo N20p Chromebook.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
 - [Metal Spudger](#) (1)
-

Step 1 — Keyboard

-  Power down the Chromebook before starting any repair.
-  Remove the two 3.5 mm Phillips #0 screws using a screwdriver.
-  It is only necessary to remove these two screws to complete this step.

Step 2

- Use the hook of the metal spudger to carefully lift up the keyboard.

⚠ Lift the keyboard carefully. If you lift too quickly, it might break the two cables that connect the keyboard to the motherboard.

Step 3

- Carefully, disconnect the keyboard cable from the motherboard carefully by pulling on the blue tab of the cable.
- You will now be able to replace the keyboard.

To reassemble your device, follow these instructions in reverse order.
