

Trek 820 Pedal Replacement

This guide will walk you through on how to replace the pedals on your Trek 820 bike.

Written By: Kaveh Karimiyanha

INTRODUCTION

Use this guide you to remove or replace your pedals for the Trek 820.

Pedals are the least serviced parts of a bike and can become a problem when bushes and bearings are worn. Rough pedals that have a hard knock or don't release to your cleats should be replaced.

TOOLS:

- [7/16" Wrench](#) (1)

Step 1 — Pedals

- Lock the 7/16" wrench with the pedal and carefully unscrew until it comes off.
- ⓘ Unscrew the left pedal clockwise and the right pedal counter-clockwise.

Step 2

- Replace the old pedal with the new one.
- ⓘ Screw in the left pedal counter-clockwise and the right pedal clockwise.

To reassemble your device, follow these instructions in reverse order.
