

How to play Super Mario Bros on the TI-84 Plus

This guide teaches how to put Super Mario on your TI-84 Plus calculator.

Written By: Aaron Cooke

INTRODUCTION

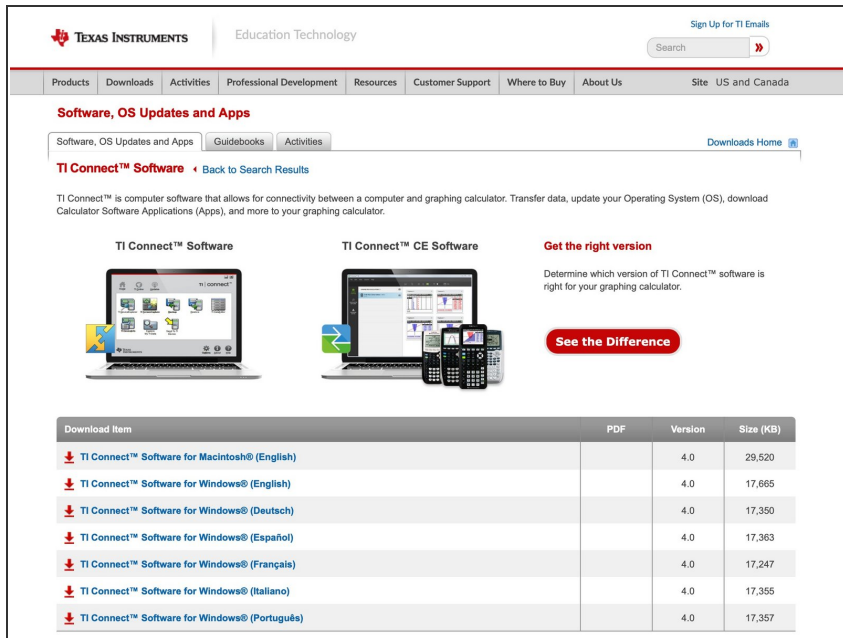

This technique explains how to send and run Super Mario on a TI 84 Plus. This method will work for a TI 84 Plus, TI 84 Plus t, and the TI 84 Plus SE. It will not work on the TI 84 Plus CSE nor the TI 84 Plus CE.

PARTS:

- [USB-A to mini USB-B cable](#) (1)
-

Step 1 — Download the necessary software

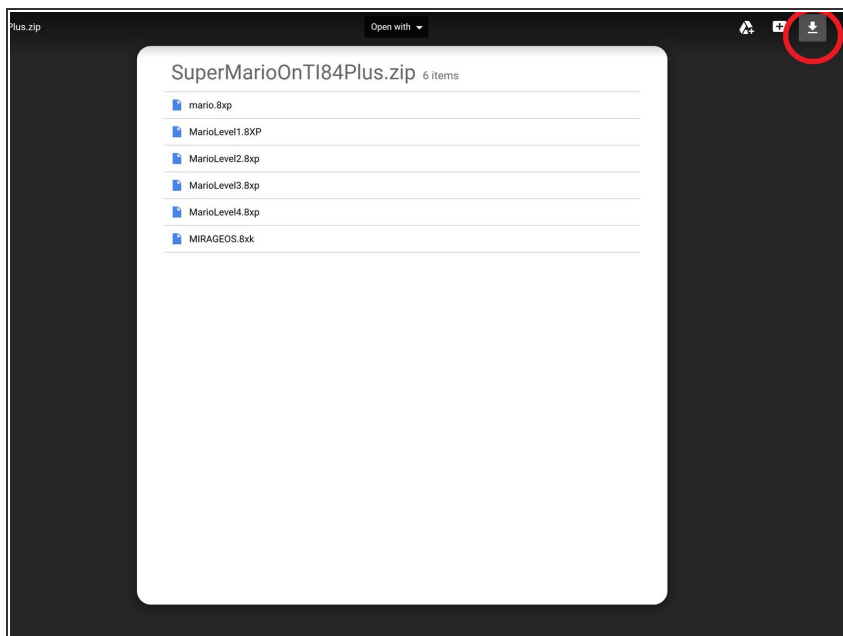

The screenshot shows the TI Connect Software download page. It features a navigation menu with options like Products, Downloads, and Activities. The main content area is titled "TI Connect™ Software" and includes a "Get the right version" section with a "See the Difference" button. Below this is a table of download items.

Download Item	PDF	Version	Size (KB)
TI Connect™ Software for Macintosh® (English)		4.0	29,520
TI Connect™ Software for Windows® (English)		4.0	17,665
TI Connect™ Software for Windows® (Deutsch)		4.0	17,350
TI Connect™ Software for Windows® (Español)		4.0	17,363
TI Connect™ Software for Windows® (Français)		4.0	17,247
TI Connect™ Software for Windows® (Italiano)		4.0	17,355
TI Connect™ Software for Windows® (Português)		4.0	17,357

- Download TI Connect, make sure you download the right version according to your OS.

Step 2 — MirageOS and Super Mario game file

The screenshot shows a file manager interface with a list of files inside a zip file named "SuperMarioOnTI84Plus.zip". The files listed are:

- mario.8xp
- MarioLevel1.8XP
- MarioLevel2.8xp
- MarioLevel3.8xp
- MarioLevel4.8xp
- MIRAGEOS.8xk

- Using [this link](#), download and send all files to your calculator. Included is a shell called MirageOS. MirageOS will allow you to easily run the game.

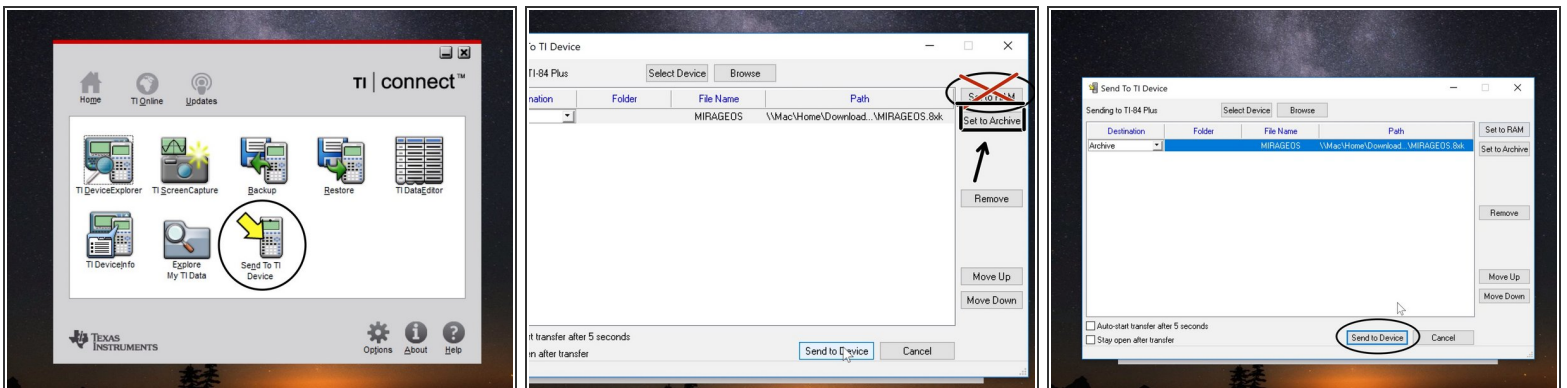

⚠ Make sure to extract the files from the .zip before trying to send them to your calculator!

Step 3 — Installing TI Connect

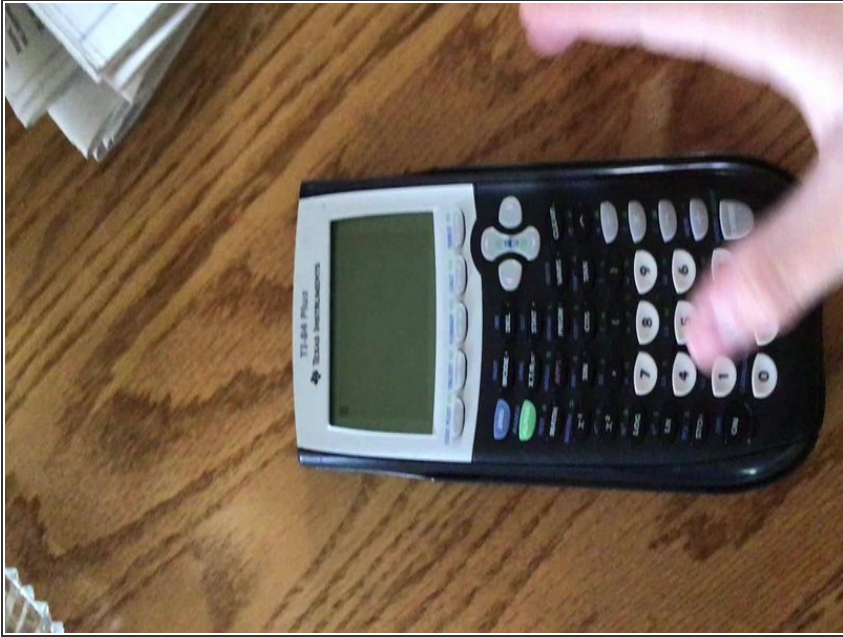

- Open TI Connect, and install it onto your computer. You will need admin privileges to install it.
- Once you are done installing TI Connect, connect the small end of the USB cable to the calculator, and then connect the larger end to your computer.

Step 4 — TI Connect & MirageOS

- Once TI Connect has installed, open the TI Connect app. Click on Send to Device.
- Click browse, then find MirageOS, then open the MirageOS.8xp file in the TI Connect app. Click Set to Archive twice at the top once it has loaded, and then click Send to Device.
- ① After clicking Send to device, if TI Connect does not open a mini dialog that says it is sending the file over after 10 seconds, click Send to Device again, and repeat until it shows that dialog

Step 5 — How to play

- Now, turn on your calculator. Press the [apps] button, then scroll down to MirageOS and click [enter]. Press [enter] on MAIN, then press [enter] again on MARIO. You should see the Super Mario screen now. Press [enter] on a level to start playing.
- ⓘ The controls for playing are 2ND to jump, arrow keys to move, and ALPHA for special abilities ex: flower abilities.
- ⓘ To exit out of Super Mario, press [clear] and when back at the MARIO & MAIN selection screen cursor up to MAIN and press [2nd] and [mode].

Hope you enjoyed this guide, and happy gaming! Please note that if your calculator crashes during execution, or you reset all memory on the calculator, you will need to resend the game over again.
