

Nokia 8290 Battery/Back Cover Replacement

Use this guide to install or replace your Nokia 8290's battery and/or back cover.

Written By: Austin Culberson

INTRODUCTION

The back cover protects the battery and the SIM card. The battery powers your phone, while the SIM card holds all of your phone's data. The phone's serial number can be found underneath the battery.

Step 1 — Battery/Back Cover

- Hold the phone face-down and locate the button at the bottom of the back cover.
 - While pressing the button, slide the back cover down and away from the phone.
 - Remove the back cover.
- i** The images seen here do not contain a battery.

Step 2

- Hold the phone face-down and locate the small depression located in the lower, right-hand corner of the battery compartment.
 - Use your finger or a probe to lift the battery up and away from the phone.
- i** The images seen here do not contain a battery.

To reassemble your device, follow these instructions in reverse order.
