

How to open up a Nokia N9

To be used as a prerequisite for other guides, this guide will just show how to open up the device.

Written By: knipwim

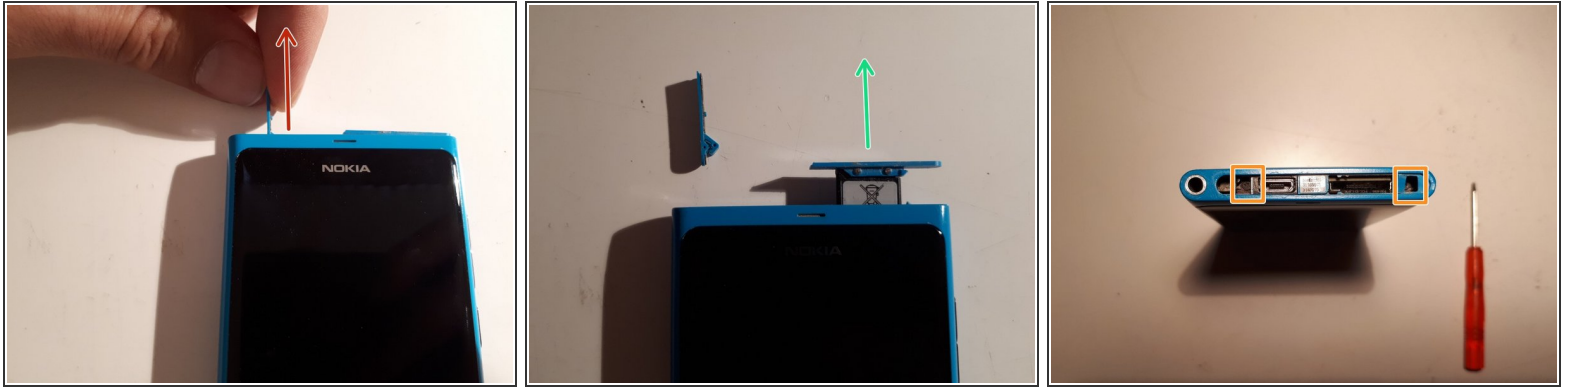

INTRODUCTION

For any internal work on the N9, you'll need to open up the device. This guide will show just that part.

TOOLS:

- [T3 Torx Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — remove top parts

- Click open the USB input protector lid and pull it from the housing.
- Also remove the SIM card holder.
- Remove screws from the top.

Step 2 — loosen the screen

- Press your screwdriver against the backside of the white pieces of plastic, and the screen will click out at the top side of the phone.

Step 3 — disconnect screen from phone

- Using a plastic tool, carefully open up the distance between the screen and the housing until the screen is only attached with 2 cables.
- With the same plastic tool, disconnect the screen cables still attached to the phone.
- The screen is now separated from the rest of the phone.

To reassemble your device, follow these instructions in reverse order.
