Taping Over The Display

Cover a broken iPhone X-series display with packing tape prior to making repairs.

Written By: Jeff Suovanen

INTRODUCTION

Use this guide to cover a broken iPhone X-series display with packing tape prior to making repairs.

⚙ PARTS:

- Packing Tape (1)

This document was generated on 2020-11-28 06:53:27 AM (MST).

Step 1 — Tape over any cracks

- If your iPhone has a cracked screen, keep further breakage contained and prevent bodily harm during your repair by taping over the glass.

- Lay overlapping strips of packing tape over the iPhone's display until the whole face is covered.
  - ⓘ This will keep glass shards contained and provide structural integrity when prying and lifting the display.

- ⚠ Wear safety glasses to protect your eyes from any glass shaken free during the repair.

- If the broken glass makes it difficult to get a suction cup to stick in the next few steps, try folding a strong piece of tape (such as duct tape) into a handle and lifting the display with that instead.
