Step 1 — Back Panel

- With the opening facing you, flip the laptop over and remove the following screws from the back panel:

  - Six 4mm Phillips screws using a Phillips #0 screwdriver.

  - One 12mm Phillips screw in the center using a Phillips #0 screwdriver.

Step 2

- Using a plastic spudger, remove the two rubber stoppers closest to the hinge to reveal the screws underneath.

Step 3

- Remove the following screws:
  - Two 4mm Phillips screws using a Phillips #0 screwdriver.

Step 4

- Using a plastic spudger (and a fair amount of force), pry the back panel up from the keyboard to separate.

- (i) You may have to use one spudger to wedge between the back panel and keyboard while using another to pry it open in a different spot.

To reassemble your device, follow these instructions in reverse order.
