INTRODUCTION

Once the back cover, battery, and motherboard have been removed, the keypad can accessed.
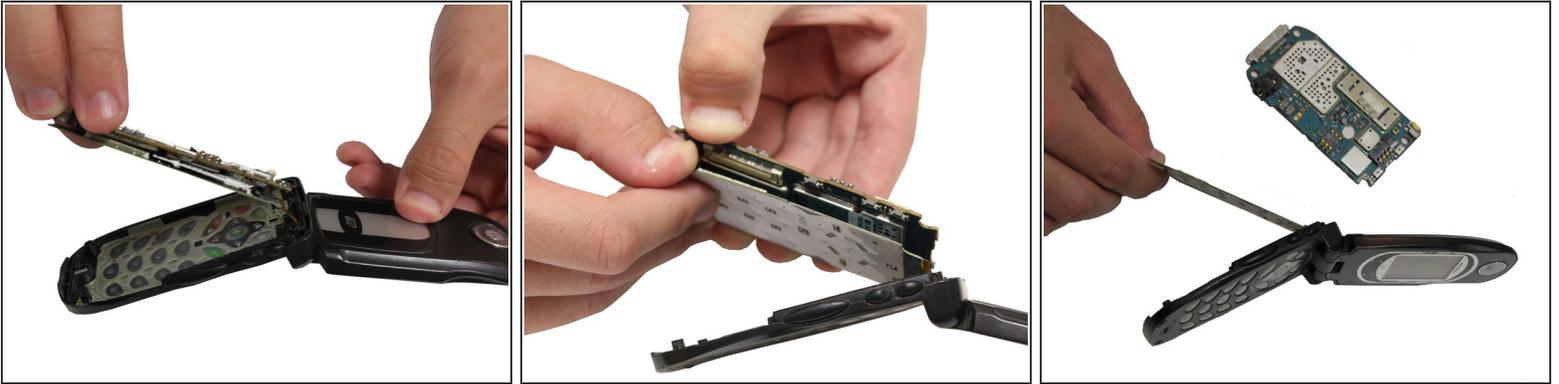

Step 1 — Battery Cover

- Slide the cover release button towards the bottom of the phone

- Once the battery cover pops up, slide the cover towards the top of the phone and lift up.
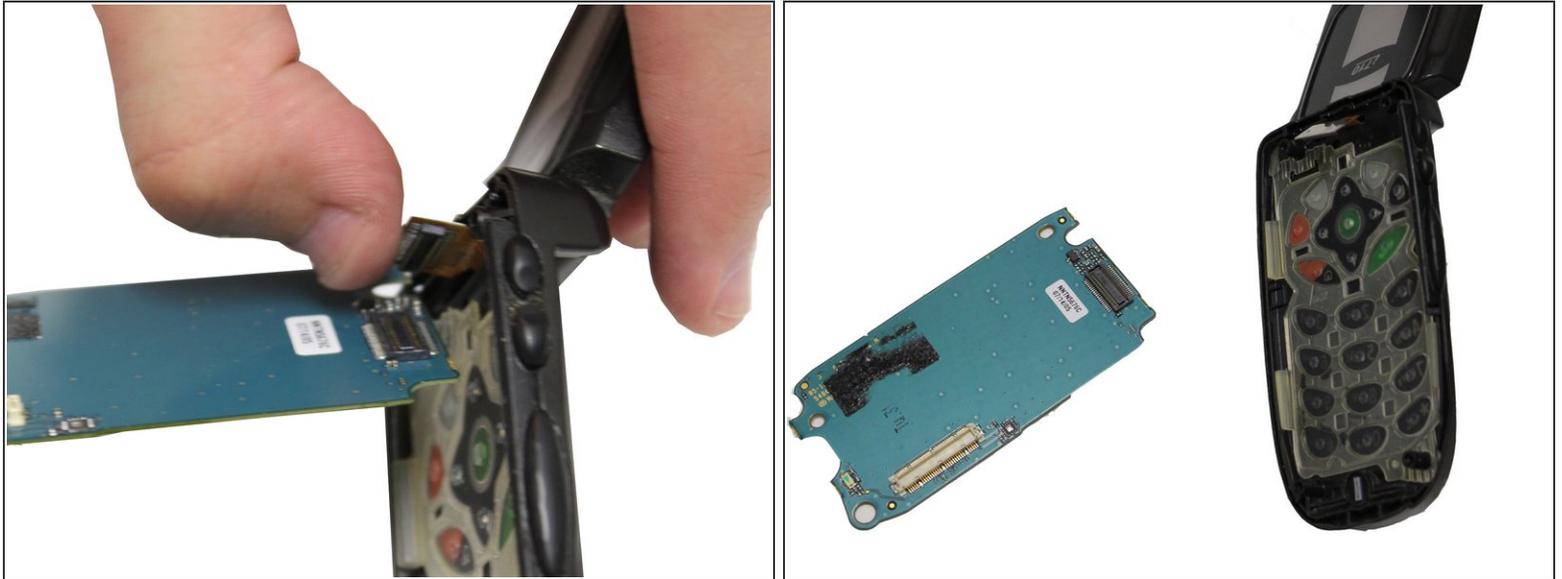

Step 2 — Battery

- Push the battery towards the top of the phone and lift up.

Step 3 — Motherboard

- Lift the motherboard away from the case of the phone, being careful not to break the wire that goes up into the hinge.

- Peel the motherboard off of the keypad. The two pieces are glued together and separate without much effort.

- The motherboard should now be completely disconnected from the phone.

Step 4 — Keypad Sensor

- Once the motherboard has been removed from the keypad, the keypad sensor can be detached from the phone at the hinge.

- Gently pry off the cable connecting the keypad sensor. The keypad sensor should now be completely separated from the phone.

To reassemble your device, follow these instructions in reverse order.
