Written By: Jalin Shavers

## INTRODUCTION

To put the panel back on the laptop reverse the order of the guide.

---

### TOOLS:

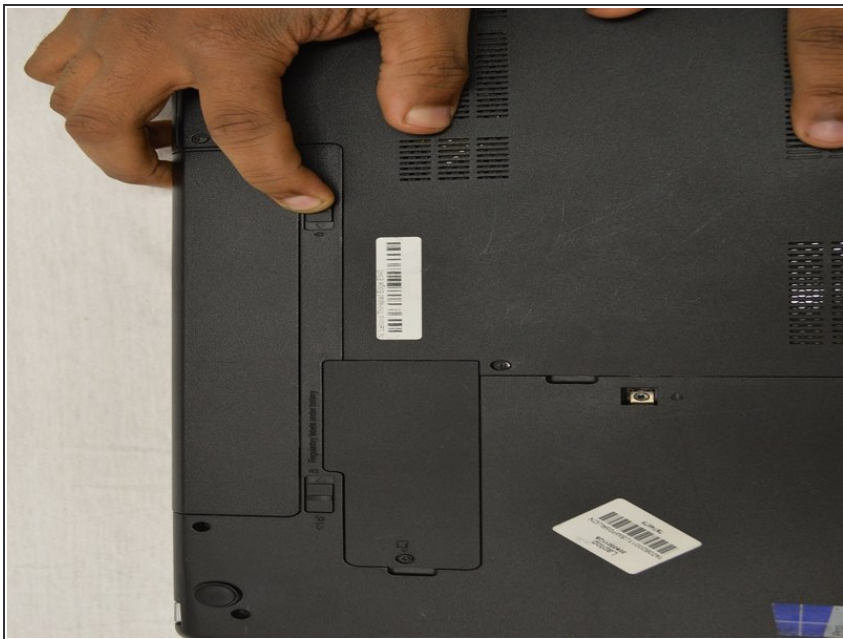

- [Metal Spudger](#) (1)
  - [Phillips #00 Screwdriver](#) (1)
-

## Step 1 — Battery

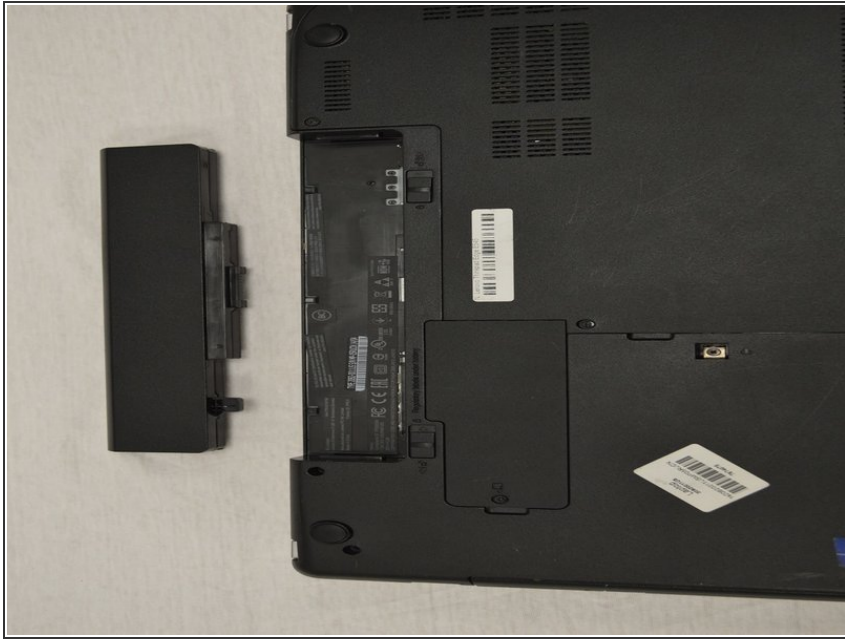

- First, flip the laptop over as shown in the photo.

## Step 2

- Below both the bottom left and right of the battery there are locks.
- Push them inward toward each other to release the battery.

### Step 3

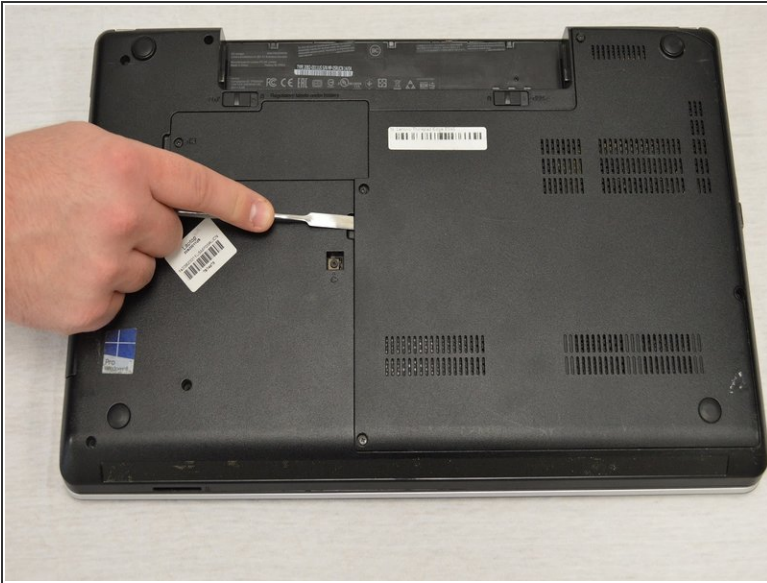

- Gently pull the battery away from the device.

### Step 4 — Back Panel

- On the right side of the back of the laptop, the right most panel will be a shape of an rectangle.
- Using a Phillips screwdriver, remove the 4 screws that are around the edges of the panel.
- ⓘ It is recommend that you fully remove the screw and place them in a secure location.
- ⚠ Make sure to use the appropriate screwdriver that fits the screws. Using an incorrect one could the cause the damage to the screws or screwdriver.

## Step 5

- Once all the screws are removed, gently slide the metal scalpel as seen in the photos. to pry it open then slowly lift the panel up with your hands and then process to lift the other side.
- Pry it open then slowly lift the panel up with your hands on the left side and then process to lift the other side towards the right.

## Step 6

- The back of the laptop will look like this once the back panel is removed.
- ⓘ Do not touch any part unless instructed otherwise as many small components can be easily damaged.
