

Motorola Droid 4 Battery Replacement

Replace the battery in your Motorola Droid 4.

Written By: Gaetan

INTRODUCTION

Use this guide to remove or replace the battery in your Motorola Droid 4.

If your battery is swollen, [take appropriate precautions](#).

TOOLS:

- [Motorola Rear Cover Removal Tool](#) (1)
 - [Spudger](#) (1)
 - [T5 Torx Screwdriver](#) (1)
-

Step 1 — Removing Rear Panel

To unlock the rear cover, insert the rear cover removal tool (packaged with your smartphone) in the hole near the back camera lens, then slide the cover down to remove.

If you have any problems unlocking or removing the rear cover, please take your smartphone to any Verizon Wireless store for assistance.

- Insert the rear cover removal tool, or a paper clip, in the hole near the back camera lens.
- Slide the cover down to remove.

Step 2 — Battery

- Remove the sticker on the rear compartment to reveal the battery.
- ⚠ Hold the battery with your thumb while removing the sticker or you might end up ripping the battery out of the phone, damaging the flex cable.

Step 3

- Use the [T5 Torx Screwdriver](#) to remove both 2.5 mm screws from the battery cable.
- Use the [Spudger](#) to unstick the battery.

 It's difficult to remove the battery without a pry tool like the spudger because of the strong adhesive. If you try removing it with just your fingers, the battery may bend.

To reassemble your device, follow these instructions in reverse order.
