This is a guide to replace the buttons on the 2006 Honda CR-V key fob.

Written By: Spencer Greer

INTRODUCTION

This fast fix is to fix the buttons on a 2006 Honda Cr-V key fob. It is a very simple and easy fix. You will only need one tool and the replacement part.

TOOLS:

- [Micro screwdriver](#) (1)

PARTS:

- [Key Fob Buttons](#) (1)
-

Step 1 — 2006 Honda CR-V Key Fob

- You will need to take the key off the ring.

Step 2

- The second step is to take out the little screw on the back side of the key.

Step 3

- Unclip the back part of your key.

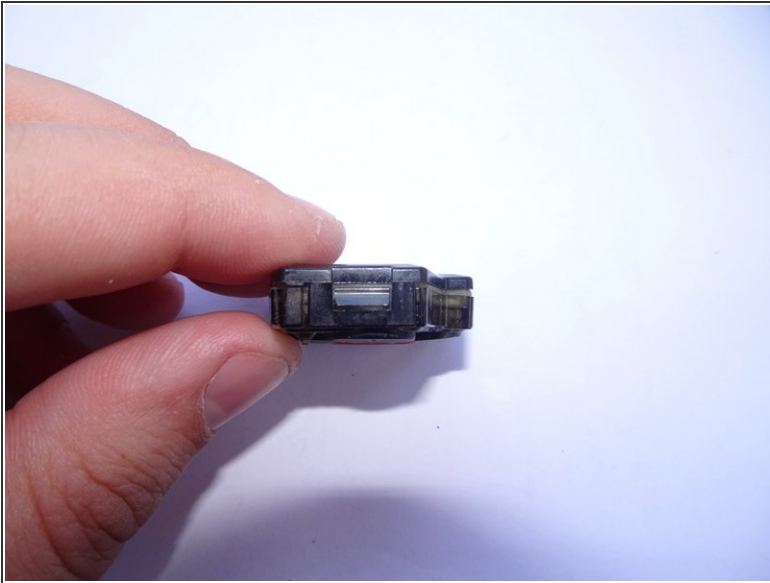

⚠ This part is super fragile.

Step 4

- You will push the buttons from the front side to have the middle piece fall out.

Step 5

- Then you will unclip the middle part. There is one clip on each side of this piece. They are super fragile and can break easily.

Step 6

- Then push the buttons from the front side to push out a rubber insert.

Step 7

- Then peel out the mother chip and replace your rubber insert.

To reassemble your device, follow these instructions in reverse order.
