

# Samsung Galaxy J6 Display Replacement

Follow this guide to replace the display of the Galaxy J6 device.

Written By: Smilzo

 **TOOLS:**

- [iFixit Opening Tool](#) (1)
  - [iFixit Opening Picks \(Set of 6\)](#) (1)
  - [iSesamo Opening Tool](#) (1)
-

## Step 1 — Display

**⚠** This repair has the potential to send glass shards flying. Wear eye protection while performing this repair to prevent any injuries.

- Heat the edge of the display with an iOpener, heat gun, or hair dryer.
- Insert a pick between the phone chassis and display at the top of the phone to start separating the display.
- i** Be wary of any connectors while removing the screen, which are located at the bottom of the device. Disconnecting these will allow for further repairs of the device (if needed).

## Step 2

- Lift the display.

This document was generated on 2021-10-03 12:30:58 AM (MST).

## Step 3

- Release the black plastic door that covers the display connector.
- Disconnect the display connector.
- Remove the old display and place the double-sided tape on the new display.

To reassemble your device, follow these instructions in reverse order.
