Microsoft Surface Pro 4 Kickstand Replacement

This guide will show you how to replace the kickstand of your Microsoft Surface Pro 4 if it breaks or is damaged.

Written By: Sarah Westberg
INTRODUCTION

If you need to replace the kickstand of your Microsoft Surface Pro 4, this guide will show you how.

If it breaks or is damaged, you might want to replace it. It's possible that your kickstand could become wobbly from overuse or if you drop it. The repair is not a difficult process, and you won’t have to take apart the actual Surface Pro 4. You’ll just have to remove and replace the kickstand itself.

<tr>
<td>* T5 Torx Screwdriver (1)</td>
<td>* Surface Pro 4 Kickstand (1)</td>
</tr>
</tbody>
</table>
Step 1 — Kickstand

- Lift the kickstand to a 90° angle to expose the hinge screws.

Step 2

- Remove the four 3.3 mm T5 screws—two on each side of the kickstand.
Step 3

Remove the kickstand from the back cover.

To reassemble your device, follow these instructions in reverse order.
