INTRODUCTION

If the printed page appears with streaks, faded colors, or incorrect colors, replacing the ink cartridges is a possible solution. New ink cartridges improve the quality and appearance of the printed document.
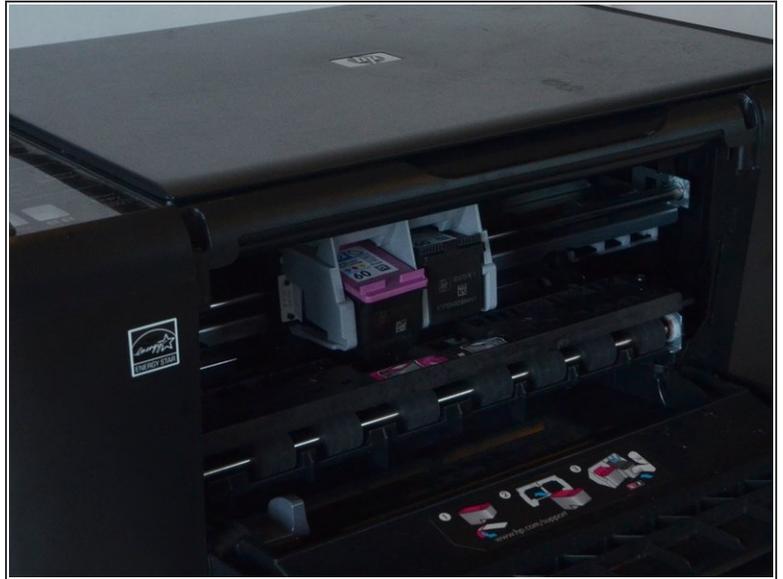

Step 1 — Open front access panel

- Open the front access panel by placing your finger in the front slot and pulling gently.

Step 2 — Ink Cartridges

- Slide the ink carriage until the the cartridges line up with the marked slots in the middle.

- (i) If the printer is on, then the carriage should have automatically slid to the middle when the front was opened. If not, ensure printer is unplugged and slide manually.

Step 3

- Gently, but firmly depress the front of the ink cartridge you are removing until it is loose.

- (i) There may be a faint click when the cartridge comes loose.

Step 4

- Gently slide out cartridge.

- ⚠ Don't make contact with the ink head. The ink likes to get everywhere.

To reassemble your device, follow these instructions in reverse order.
