

Toshiba Satellite U405D-S2902 Battery Replacement

This guide will demonstrate how to remove a dysfunctional battery and replace it with a working one.

Written By: Brandon Kirklen

INTRODUCTION

The battery on the Satellite is relatively small and after a year or so it may no longer hold a full charge. Replacing the battery will allow you to retain the full functional life.

Step 1 — Battery

- ❗ Make sure that the laptop is off and unplugged.
- Turn the laptop over.
- Slide back the left lock, and you should hear a click when it is successfully locked back in.

Step 2

- Rotate the laptop 180 degrees so that the battery is near you.
- Hold back the spring slide and pull the battery out.

To reassemble your device, follow these instructions in reverse order.
