Step 1 — Rear Camera Lens Cover

- To begin with, it will be necessary to remove the pieces of glass from the old broken camera lens.

Step 2

- Once the glass shards from the camera lens are removed, thoroughly clean the camera bezel (the raised metal part around the camera).

Step 3

- Adhere some double sided tape or two dots of glue on the new iPhone X rear camera cover.

- Use tweezers to position the glass lens in its housing.

Step 4

- Lightly press down on the lens for a few seconds to create a good seal.

- You can test your rear camera to verify the quality of your photos and videos.
