Step 1 — Final Thoughts

REPAIRABILITY SCORE:

- The Galaxy Buds Plus earn a **7 out of 10** on our repairability scale (10 is easiest to repair):
 - External assemblies are held together with clips instead of glue, making for a non-destructive entry process.
 - Disassembly can be accomplished with common prying tools and a Phillips screwdriver.
 - The earbuds use rechargeable coin-cell batteries that are easier than ever to replace.
 - Opening procedure is a bit unorthodox, and can cause cosmetic damage to the buds.
 - Careful prying is required throughout to separate components without tearing fragile cables or otherwise damaging the buds.
