Samsung Galaxy J5 2017 Display Replacement

Follow this guide to replace the display in a Samsung Galaxy J5 2017.

Written By: Smilzo
Step 1 — Display

- Using an iOpener, hairdryer or heated plate, heat the glass to weaken the adhesive beneath.
- It is important to use thin tools on the whole profile and insert them between the plastic frame and the glass. Don't insert between the aluminum frame and the plastic frame else you may damage the device.
Step 2

- Lift the display from the bottom to the top where the flat and its connector are located.
- Remove the black interlocking cover.
- Release the connector.
- Remove any trace of glue from the surfaces and install the new display.

To reassemble the device, follow these instructions in reverse order.
