GPD Win Battery Replacement

This guide will show users how to safely open and replace the battery and their GPD Win.

Written By: Michael d Hinsberger
INTRODUCTION

Follow this guide to learn how to replace the battery of your GPD Win. Be sure to power off your device prior to starting the guide.

TOOLS:

- iFixit Opening Tools (1)
- 64 Bit Driver Kit (1)
- Rextin 50M Meters 10MM 3M Double Sided Tape Adhesive Stronger Stick (1)
Step 1 — Battery

- Shut down your GPD Win.

Step 2

- Remove SD card and duct cover.
Step 3

- Remove the six PH #00 screws on the back of the GPD.

Step 4

- Carefully insert the pry tool between the keyboard and case.
- Move the tool around the edge until every clip is released.
- Carefully lift the back half of the case.
- You'll see a small ribbon connector on the right. Use your pry tool to remove it by lifting up.
- On the right, you'll see another white connector going to the battery. Use the pry tool and pull back on the connector to release it.
Step 5

- Separate the two halves of the device.
- Use the pry tool and slowly and carefully separate the adhesive from the back of the case.
- Remove old battery.

Step 6

- Use two to three strips of the double sided tape and apply it to the back of the battery.
- Line up the battery with the lines on the case and the connector on the right.

To reassemble your device, follow these instructions in reverse order.
