

Palm Treo 680 Back Panel Replacement

How to replace a Palm Treo 680 back panel.

Written By: Maiya123

INTRODUCTION

This guide shows you how to take off the back panel to the Palm Treo 680 in order to reach the other components within side the phone.

TOOLS:

- [T5 Torx Screwdriver](#) (1)

Some models

- [T6 Torx Screwdriver](#) (1)
 - [Tweezers](#) (1)
 - [Spudger](#) (1)
 - [Metal Spudger](#) (1)
-

Step 1 — Battery

- Remove the battery cover by pressing on the small rectangular button located on the back of the phone.

Step 2

- Remove the battery by pulling it out towards you.

Step 3 — Back Panel

- Remove the stylus in order to access the screw.
- Remove the 27mm top-left screw using a T6 Torx screwdriver.

Step 4

- Using the spudger, remove the rubber rectangular cover located in the upper rear, right-hand corner.
- Remove the 27mm screw using the T6 Torx screwdriver.
 - ⓘ If there is a red Palm sticker covering this screw, puncture it to access the screw.

Step 5

- Remove the remaining two 27mm screws from the bottom using the T6 screwdriver.

Step 6

- Turn the phone so the screen is facing the right side.
- Use a spudger to carefully separate the back panel from the front panel to access components inside the phone.
- Separate the covers from the left side of the device as indicated in the picture.
 - ⚠ The right side contains orange ribbons that are easily damaged.

To reassemble your device, follow these instructions in reverse order.
