How to Assemble the iMac Cardboard Service Wedge

Assembling the iFixit iMac Cardboard Service Wedge for use during iMac repairs.

Written By: Craig Lloyd

INTRODUCTION

Follow this guide to assemble the iMac Cardboard Service Wedge, which ships unfolded and flat. Once assembled, this product is not designed to be unfolded.
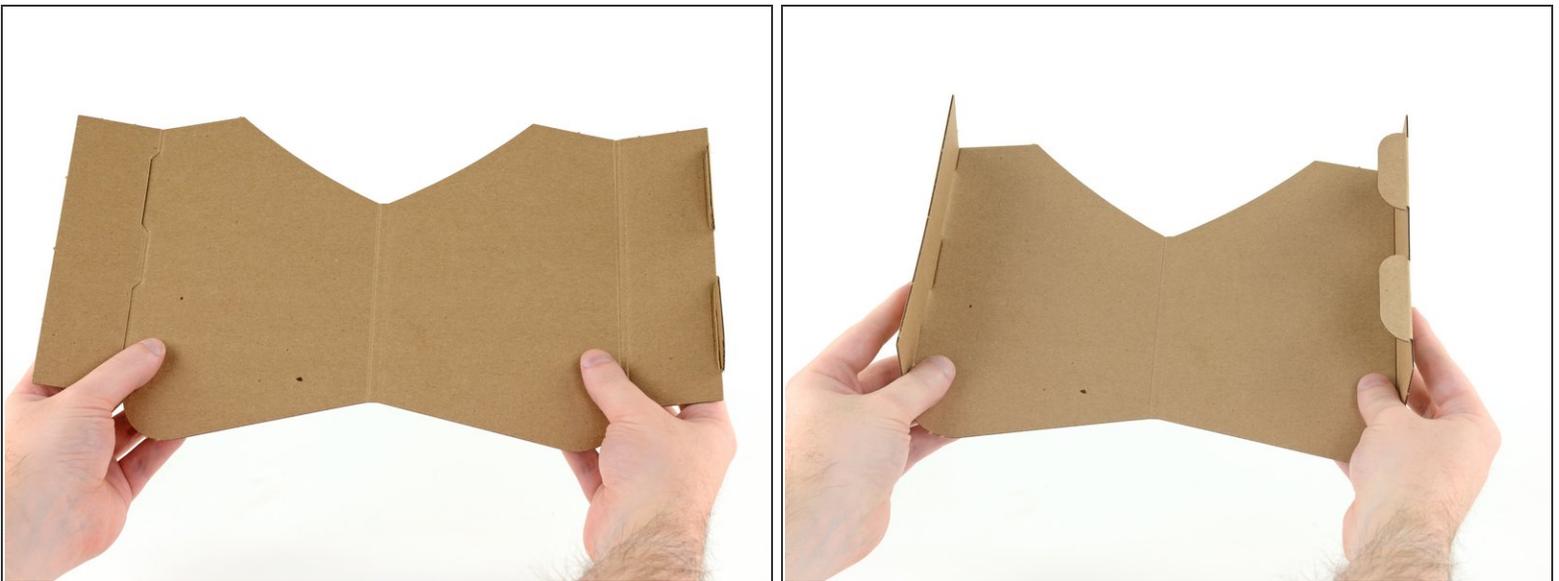

⚙ PARTS:

- iMac Intel 21.5" Cardboard Service Wedge (1)
- iMac Intel 27" Cardboard Service Wedge (1)

This document was generated on 2020-11-21 01:18:27 AM (MST).

Step 1 — Fold the tabs

- With the blank side facing you, fold the two tabs inward at a 90-degree angle.

Step 2 — Fold the outer side flaps

- Fold the two outer side flaps inward at a 90-degree angle.

Step 3 — Fold it in half

- Fold the two halves together, using the crease in the center as the folding point.

- Overlap the two outer side flaps, making sure the flap with the two small tabs is on top.

Step 4 — Insert the tabs into the slots

- Insert the two tabs into the slots along the fold.

- (i) Make sure the flared edges on either side of the tabs are inserted completely into the slots so that they lock in place and don't slide out.

Step 5 — Place it under your iMac

- Your iMac Cardboard Service Wedge is ready to go!

- Insert the Service Wedge under the iMac's display to hold it in place while you perform repairs on your iMac.
