

G'z One Boulder New Antenna Replacement

This guide will show you how to replace the Antenna on the phone.

Written By: troy

 **TOOLS:**

- Phillips #00 Screwdriver (1)
 - Flathead 3/32" or 2.5 mm Screwdriver (1)
-

Step 1 — New Battery

- Turn locking device on back side of phone marked by the rectangle counter clockwise.

Step 2

- Remove battery by grabbing the sides and pulling upward.
- ⚠ *If battery was malfunctioning due to age or corrosion, there may be battery acid residue on the battery and the back of the phone. Wear gloves in order to prevent skin irritation.*

Step 3 — New Antenna

- Remove back cover by taking out the four, five point star screws indicated in the picture. A 1.5mm flathead screwdriver can be used to remove the screws.
- Once all screws are removed the case will easily lift off.

Step 4

- With the back cover removed, the antenna is now exposed. To remove it, take out the phillips screw holding it in place.

Step 5

- With screw removed, gently pull the antenna outward. It should slide out easily.

To reassemble your device, follow these instructions in reverse order.
