

Dreamer Autoshade Bottom Bar Pouch Replacement

Fix a detached bottom bar for the Dreamer Autoshade

Written By: David

 **TOOLS:**

- Super glue (cyanoacrylate) (1)
-

Step 1 — Prepare Bottom Bar

- Place the shade and bottom bar on a flat surface. To require less space, roll the shade so only the bottom bar is showing.

Step 2 — Add Glue

- Add a drop of super glue directly to the double-stick tape.
- Hold the shade material on the applied glue. The glue should dry in 10-20 seconds.
- Repeat this process in any area on the bottom bar that comes unstuck.

To reassemble your device, follow these instructions in reverse order.
