

ASUSTeK B360-KYLIN Graphics Card Replacement

This guide will show you all the steps to installing a new Graphics card on your ASUSTeK B360-KYLIN Motherboard.

Written By: Alex Chukwuka

INTRODUCTION

Use this guide to install a new Graphics card into your personal computer.

In this Guide we successfully installed an Nvidia GeForce GTX 1660 SUPER on a ASUSTeK B360-KYLIN Motherboard using only a crosshead screwdriver.

Be careful to set up your system in a static free environment so as to mitigate the likelihood of being electrocuted.

Before using this guide make sure you have deleted all old driver files on your system so as to prepare your system for a fresh driver install.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)

Step 1 — Graphics Card

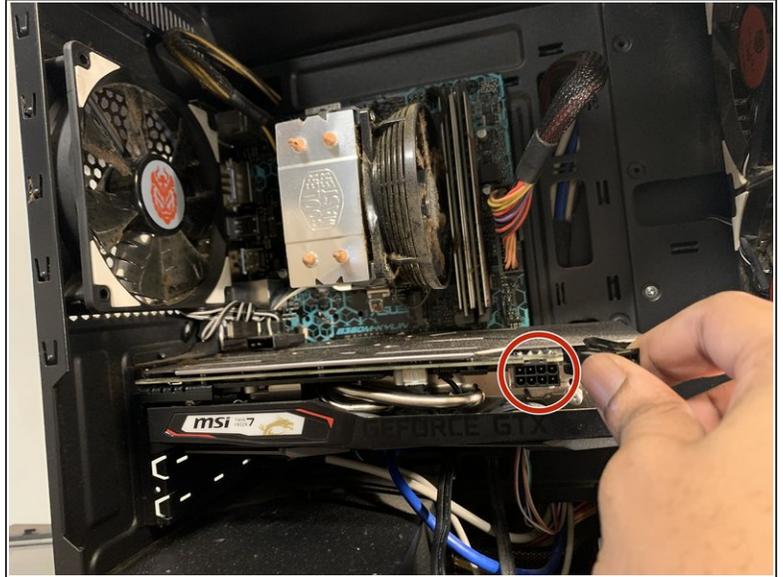

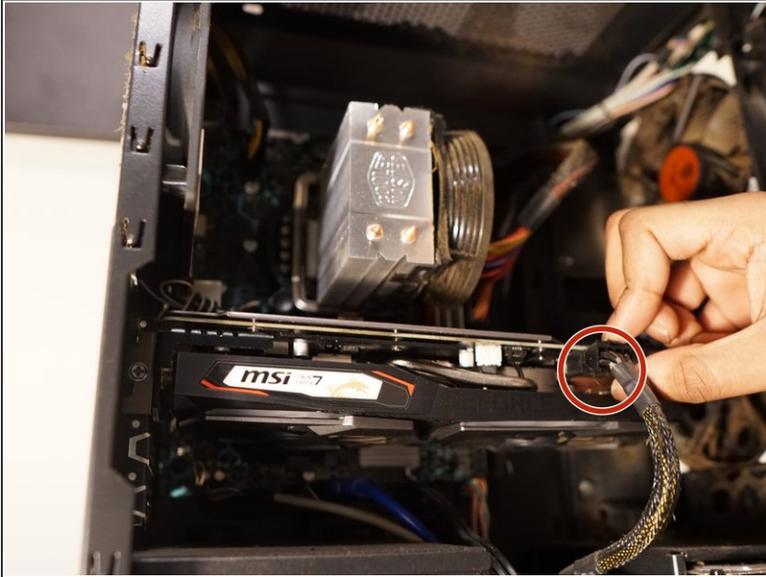

- Remove the two screws holding the cover to the rest of the computer case.

Step 2

- Remove the cover case from your computer.

Step 3

- Unplug the power cable on the graphics card.

Step 4

- Using a Phillips #1 screwdriver, remove the screw holding the graphics card to the case.

Step 5

- Gently remove the graphics card out of the device.

To reassemble your device, follow these instructions in reverse order.
