Logitech MX Master Key Replacement

Remove a key. Put it back.

Written By: sitarane
INTRODUCTION

Useful for rearranging the layout, or cleaning a key if it doesn't move right.
Step 1 — Take out key

- Insert something thin under the top of the key.
- Apply a little force. It comes out easily.

Step 2 — Anatomy of a key

- Anatomy of a key
- Clips at the top (clip in)
- Hooks at the bottom (slide in)
Step 3 — Put key back

- Slide in bottom first
- Gently push the top part in. It clips easily.

To reassemble your device, follow these instructions in reverse order.
