iBUYPOWER Trace 4 9310 M.2 NVMe Drive Replacement

How to replace a M.2 NVMe Drive in an iBUYPOWER Trace 4 9310 desktop.

Written By: Kylie Facison
INTRODUCTION

This guide will show you the steps on how to replace your M.2 NVMe Drive in your iBUYPOWER Trace 4 9310 desktop. The iBUYPOWER Trace 4 9310 comes with 2 SATA ports and 1 M.2 NVMe Drive port.

This guide can be completed within a few minutes, and you only need a small Phillips head screwdriver.

As a precaution, unplug and turn off your computer before working on it.

TOOLS:
- Small Phillips Head Screwdriver (1)

PARTS:
- Samsung 970 EVO M.2 SSD (1)
Step 1 — M.2 NVMe Drive

- Lay the desktop on its side with the glass case facing up.
- Remove the single screw.

Step 2

- Remove the glass side by pivoting it up with the bottom side still seated in the notches.
- Lift the glass side out of the notches and set it to the side.
Step 3

- Locate the M.2 drive that is right above the CPU.
- Remove the screw on the edge of the drive.

Step 4

- The drive should lift up on the edge where the screw was.
- Pull the drive out at an angle from the motherboard.
Step 5

- Line the new drive up with the slot and gently slide it in.
- Use one finger to hold the drive down while you screw it back in.

To reassemble your device, follow these instructions in reverse order.
