

Toshiba Satellite L305-S5946 Battery Replacement

Use this guide to install a new battery for your Toshiba Satellite L305-S5946.

Written By: Michael Erberich

INTRODUCTION

Use this guide to replace the battery in your Toshiba Satellite L305-S5946 laptop.

The battery is a piece of hardware that stores electrical power to run your computer. A failing battery could cause overheating in your computer or shutdowns. Older batteries don't hold charge as long as newer batteries. If your computer are facing these issues then your battery should be replaced.

The only tool you will need is iFixit opening tool. When performing the replacement make sure to shutdown the computer completely and disconnect from any power sources. When replacing the battery make sure to work in a dry and clean environment.

TOOLS:

- [iFixit Opening Tool](#) (1)
-

Step 1 — Battery

- Turn the laptop upside-down.
- Position the laptop so that the display hinges are facing away from you.

Step 2

- Slide the left battery bay latch to the left.

Step 3

- Slide the right battery bay latch to the right and hold.
- While holding onto the latch, use a plastic opening tool to lift and remove the battery bay cover.
- Remove the battery.

To reassemble your device, follow these instructions in reverse order.
