2007 Honda Accord Bass Speakers Replacement

Use this guide to replace the bass speakers in your 2007 Honda Accord.

Written By: Frankie
INTRODUCTION

I wanted more than anything to give my children a good Christmas so I bought my daughter new speakers for her car. Then in order to get me to install them I chose to create a fast fix guide. You will find comprehensive instructions here to install new speakers and amplifier into the trunk of a 2007 accord. It may seem daunting at first but take it one step at a time and remember anything can be overcome with hard work, a little know how, and a bunch of money.

Step 1 — Bass Speakers

- Using plastic opening tools, remove the floor trim panel on the driver's side door.

Step 2

- Remove the shifter frame panel with the same opening tools.
Step 3

- Unclip the heated seats harnesses.
- Remove the 12V power supply connection.

Step 4

- Remove the cubby space to access the head unit.
Step 5

- Remove the center climate vents with the opening tools.

Step 6

- Remove the head unit from the dash.
Step 7

- Attach the wiring harness into the amp by clipping it in.

Step 8

- Run the wires under the back seat and along the driver's side door sill (removed in step 1) to under the steering wheel.
Step 9

- Find a spot to drill a hole through the firewall under steering wheel area in the footwell.

Step 10

- Run the power and ground wires from the trunk through the door sill and through the firewall to the engine bay.
Step 11

- Now run the power wire where it will be out of the way.
- Run the power wire (red) and the ground wire (green) to battery, connect red to positive and green ground to a clean piece of the car body.
- Make sure to leave the power wire off until finished.

Step 12

- Remove the wiring harness from the back of the head unit.
- Connect the four speaker wires and one remote wire to the harness as suggested in the owner's manual.
Step 13

- Clamp down the wire harness on the five wires.
- Tape up the wire loom to keep it neat.
- Finally insert it back into the head unit.

Step 14

- At last put the head unit, and the panels back into the car.

To reassemble your device, follow the instructions in reverse order.
