INTRODUCTION

This guide will help you remove the front panel of the controller. It is a prerequisite guide only.

TOOLS:

- [Y1 Tri-point Screwdriver](#) (1)
-

Step 1 — Batteries

- Pull down on the battery cover release lever and pull back to remove the cover.

Step 2

- Take out each battery then put the covering back on.

Step 3 — Front Panel

- Remove the eight 9-mm Tri-Wing screws on the back panel with the Tri-wing Y1 screwdriver.
- ⓘ During reassembly, firmly hold the panels of the controller together while replacing screws so the panels don't separate.

Step 4

- After each screws has been removed carefully turn over the controller, and place on a flat surface.
- Slowly separate the top panel from the bottom panel.
- ☞ The buttons are loose and may fall off of the motherboard.
- Once seperated set aside the top panel.
- ⓘ During reassembly, make sure the front panel lines up with the buttons so they slide back into place.

To reassemble your device, follow these instructions in reverse order.
