

Nokia 1100b RH-36 Keypad Replacement

This guide will lead you through the steps...

Written By: JSwan

INTRODUCTION

This guide will lead you through the steps needed to remove the keypad in your phone.

TOOLS:

Spudger (1)

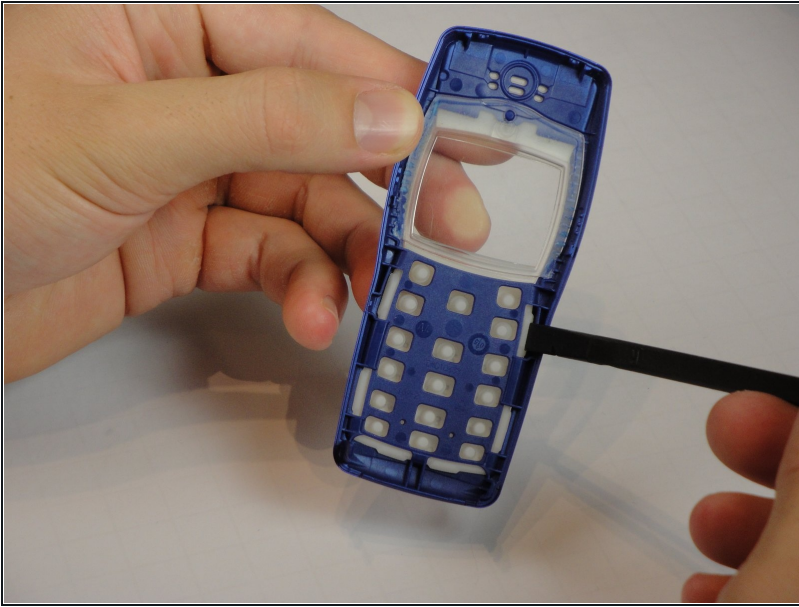

Step 1 — Front Cover

- Firmly grip the back of the casing.
- Separate the front and back casings either by pulling them apart from the middle or gently prying the front off with your fingers from the bottom.

 Be sure not to bend the casing too much when prying from the bottom. Failure to do so may cause it to crack.

Step 2 — Keypad

- Using the flat end of the spudger, push out the 4 rubber tabs on the back of the keypad to remove it.

To reassemble your device, follow these instructions in reverse order.
