

MacBook Air 11" Mid 2013 Battery Connector Replacement

Prereq to disconnect the battery.

Written By: Sam Goldheart

INTRODUCTION

Prereq to disconnect the battery.

TOOLS:

- [Spudger](#) (1)
-

Step 1 — Battery Connector

! In this step you will disconnect the battery to help avoid shorting out any components during service.

- Use the flat end of a spudger to pry both short sides of the battery connector upward to disconnect it from its socket on the logic board.
- Bend the battery cable slightly away from the logic board so the connector will not accidentally bend back and make contact with its socket.

To reassemble your device, follow these instructions in reverse order.
