INTRODUCTION

Prereq only for adhesive strips.

🔧 TOOLS:
- iFixit Opening Tools (1)
- Spudger (1)

⚙ PARTS:
- iPad Retina Adhesive Strips (1)

　　　　　www.iFixit.com

Step 1 — Home Button Control Board

- Remove the two 2.1 mm Phillips #00 Phillips screws securing the home button control board to the home button mounting bracket.

Step 2

- Wedge the flat edge of a plastic opening tool in between the right end of the home button control board and the home button mounting bracket.

- Depress the plastic opening tool downwards to pry the adhesive securing the home button control board from the home button mounting bracket.

- 📌 Repeat the procedure to release the adhesive underneath the left end of the home button control board.

Step 3

- Lift and remove the home button control board up off the home button mounting bracket.

Step 4
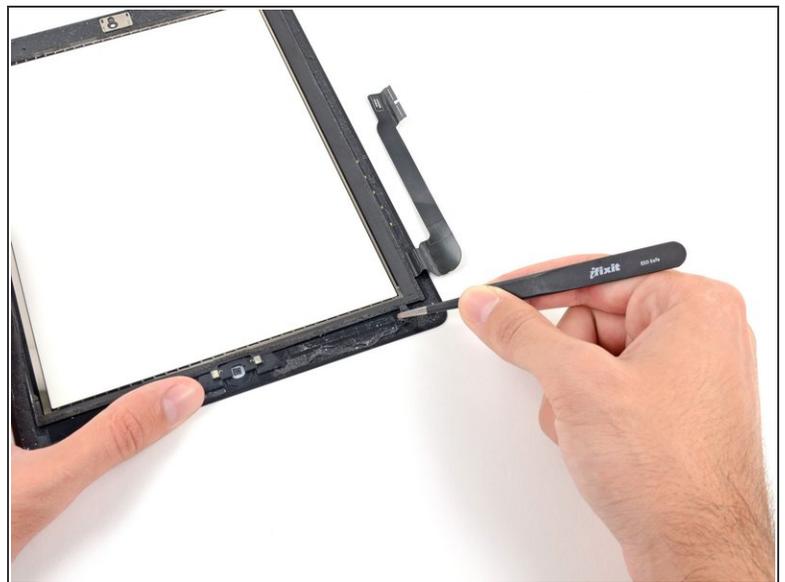

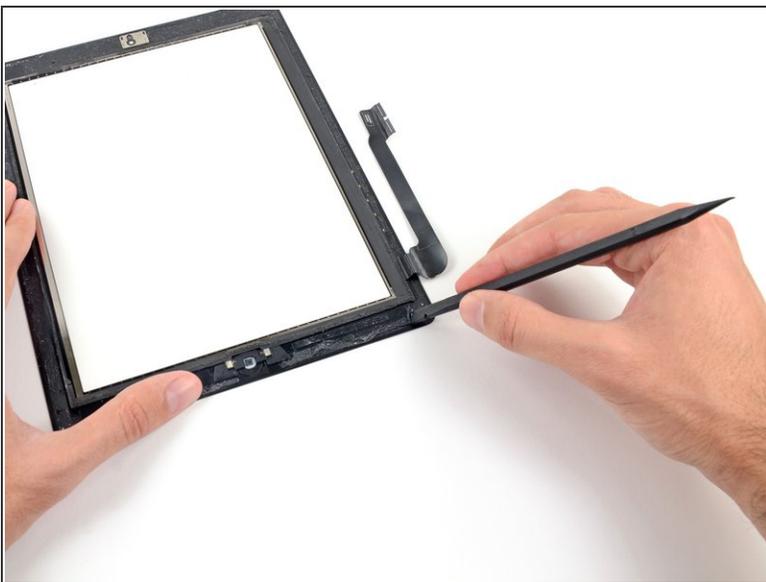

- Use the flat edge of a spudger to scrape the old adhesive off the bottom right corner of the front panel assembly.

- ⓘ If necessary, gently peel the old adhesive with a pair of tweezers.

Step 5
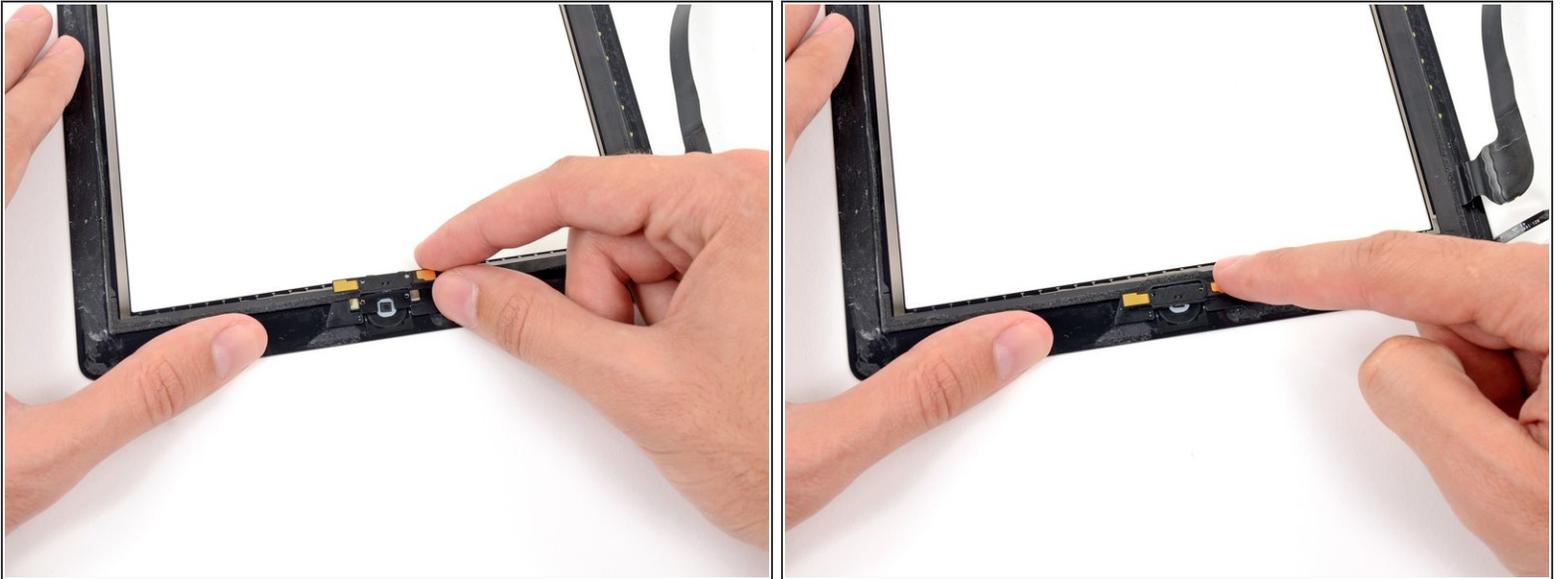

- Gently place the home button control board on top of the home button mounting bracket.

- ⓘ Make sure the home button control board is lined up with the bottom of the home button mounting bracket.

Step 6

- Insert the two 2.1 mm Phillips #00 Phillips screws back into the home button control board to secure it against the home button mounting bracket.
