

Motorola V325 External Casing Replacement

Written By: Minh Tran

INTRODUCTION

The outer housing can be removed to be cleaned or swapped to a custom housing.

TOOLS:

- [T6 Torx Screwdriver](#) (1)
-

Step 1 — External Casing

- Remove the rearmost panel by pushing down on the silver button, then simultaneously pulling downward on the panel.
- Lift the panel off of the phone.

Step 2

- Using your thumbnail or a thin flat head screwdriver, peel back the screen protector on the inside of the phone: It is only held on by glue but may take a good amount of force to be removed.

Step 3

- Unscrew the four screws using the T6 Torx Screwdriver.

Step 4

- Peel back the screen protector frame. Close phone at the hinge, then pull off the front outer casing.

To reassemble your device, follow these instructions in reverse order.
