Wahl Lithium Ion Trimmer Lithium Ion Battery Replacement

This single battery that sits on top of the circuit may die or become un-chargeable, our guide will explain how and where to connect wires and what specific battery to purchase.

Written By: nathan
TOOLS:

- Phillips #00 Screwdriver (1)
Step 1 — Disassembling of Wahl Lithium Ion Trimmer

- Begin by removing the rubber grip along the handle.

Step 2

- Remove the screws from the top to take the metal piece and plastic part off.
Step 3

- Pry open the plastic cover into two separate pieces. The plastic is very durable so don't worry about breaking it upon prying it open.

Step 4

- Here is the final result. This gives access to the switch button, chip set, battery and motor.
Step 5 — Lithium Ion Battery Replacement

- Remove the chip set, motor and battery from the plastic body. This photo shows the motor and wires connecting it to the battery.

Step 6

- Remove the white plastic cover over the chip set allowing the battery to be taken off.
Step 7

- Remove the Lithium Ion Battery and replace it with the new one that you purchased.

To reassemble your device, follow these instructions in reverse order.
